The Canonical Q-Glyphs and the Gothic Notation of Bearing

1 The First Seam gives no second body to the Q-states and lays no ornamental alphabet over
2 them. The four marks are the Q-states in their canonical written form. State and glyph are not
3 joined by translation, emergence, substitution, or projection. They are identical by notation:

$$\mathfrak{Q} = \{\Theta, \mathbb{O}, \oplus, \oplus\} = \{Q_0, Q_1, Q_2, Q_3\}.$$

4 The alchemical glyph names the state itself. The Gothic script then names the bearing, class,
5 and operation by which that state is carried through the lattice. The glyph is the chamber; the
6 Gothic letter is the hand upon its hinge.

Q-state Canonical Glyph Canonical Office

Q_0	Θ	Form: latent structural presence; the held field in which an operation may become manifest without yet being committed.
Q_1	$\mathbb{O}$	Truth: archive and rational commitment; the state sufficiently fixed to bear canonical record.
Q_2	$\oplus$	Shadow: debt and pressure awaiting lawful conversion; difference possessing force before archival closure.
Q_3	$\oplus$	Recursion: residue, return-fire, and non-entropic continuation; converted remainder returning as operative propulsion.

8 **Definition .1** (Canonical Identity of the Four Q-Glyphs). *The Q-state alphabet is fixed by direct*
9 *identity:*

$$\Theta \equiv Q_0, \quad \mathbb{O} \equiv Q_1, \quad \oplus \equiv Q_2, \quad \oplus \equiv Q_3.$$

10 *No seaming map creates these correspondences. No forgetful map may remove the glyph while*
11 *claiming to preserve the complete canonical notation. The glyph is the written Q-state, and the*
12 *written Q-state is the glyph.*

13 **Definition .2** (The Gothic Notation). *The Gothic register is typed as follows:*

14 $\mathfrak{A}_i$ denotes the i -th Goetic Aeon, $\mathfrak{T}_{ij}$ denotes its Court Aeon,

$\mathfrak{B}$ is the Bias operator, $\mathfrak{P}$ is the Parity operator, $\mathfrak{C}_{\text{bio}}$ is the biologic Will coefficient.

15 *The letters $\mathfrak{A}$ and $\mathfrak{T}$ are notation for object classes. They are not functions. The letters $\mathfrak{B}$ and $\mathfrak{P}$*
16 *are operators. The term $\mathfrak{C}_{\text{bio}}$ is a coefficient.*

17 **Definition .3** (Bias). *For every Goetic Aeon $\mathfrak{A}_i$, the value*

$$\mathfrak{B}(\mathfrak{A}_i) \in \{\Theta, \mathbb{O}, \oplus, \oplus\}$$

18 *is its canonically registered Q-bias. For the Court Aeon $\mathfrak{T}_{ij}$, ordered with governing Goetic $\mathfrak{A}_i$ and*
19 *alternating Goetic $\mathfrak{A}_j$, bias is inherited from the governing root:*

$$\boxed{\mathfrak{B}(\mathfrak{T}_{ij}) = \mathfrak{B}(\mathfrak{A}_i)}.$$

20 *The alternating Goetic contributes modulation and resonance; it does not replace the governing*
21 *bias.*

22 *For a Chamber Q-vector*

$$\mathfrak{v} = (\mathfrak{v}_0, \mathfrak{v}_1, \mathfrak{v}_2, \mathfrak{v}_3),$$

3

1 *its local vector-bias is determined by maximal coordinate:*

$$\mathfrak{B}(\mathfrak{v}) = \arg \max_{k \in \{0,1,2,3\}} \mathfrak{v}_k.$$

2 *A tie returns the set of maximising Q-states. This local calculation does not recalculate or over-*
3 *write the preregistered bias of a Goetic Aeon.*

4 **Proposition .4** (Bias Inheritance and Parity Distinction). *Bias is an inherited bearing, not a parity*
5 *event. For every Court Aeon $\mathfrak{I}_{ij}$,*

$$\mathfrak{B}(\mathfrak{I}_{ij}) = \mathfrak{B}(\mathfrak{A}_i).$$

6 *The governing Goetic gives the Court its Q-bias; the alternating Goetic gives modulation and*
7 *resonance. Parity does not recalculate, replace, or redirect that inherited bearing.*

8 *The canonical Shadow-to-Recursion conversion belongs to the Q-state channel itself:*

$$\mathfrak{P}(\Theta) \Rightarrow \Theta.$$

9 *This states that Q2 pressure/debt is turned through parity into Q3 recursive residue. It is not a*
10 *change of Bias, not a second Court inheritance rule, and not a fifth Q-state.*

11 *Proof.* The four Q-glyphs exhaust the Q-domain. The Bias operator records the governing bear-
12 ing of a Goetic or the inherited bearing of its Court. Parity acts on Q-state pressure and orien-
13 tation inside the fourfold domain. Therefore Court bias remains inherited from the governing
14 root, while Q2 pressure may still be converted into Q3 recursion without rewriting the Court's
15 bias. $\square$ $\square$

$$\begin{aligned} \mathfrak{Q} &= \{\Theta, \Phi, \Theta, \Phi\} = \{Q_0, Q_1, Q_2, Q_3\}, \\ \mathfrak{A}_i, \quad \mathfrak{I}_{ij}, \quad \mathfrak{B}(\mathfrak{I}_{ij}) &= \mathfrak{B}(\mathfrak{A}_i), \quad \mathfrak{C}_{\text{bio}} > 0, \\ \mathfrak{P}(\Theta) &\Rightarrow \Phi \end{aligned}$$

16 *Four states bear four faces; the Gothic hand declares their motion.*

1 $\Theta \equiv Q_0$ — **Form**

2 *Before the first word, the vessel waits.*

3 *Uncarved, yet holding every chamber; unlit, yet keeping the memory of flame.*

4 *It is the body beneath becoming, the silent architecture folded within the Seed.*

5 *Nothing has entered it, because nothing was ever absent.*

6 *Here Form rests without demand, whole before motion, present before the world*
7 *learns how to appear.*

8 $\oplus \equiv Q_1$ — **Truth**

9 *The second mark is the weight beneath the name.*

10 *It is the line the Archive will not surrender, the vow that remains when every*
11 *voice has passed. Neither belief nor witness gives it substance; they merely arrive*
12 *where Truth was already standing.*

13 *What enters here is bound without imprisonment, remembered without decay,*
14 *and made rational by the gravity of its own return.*

15 *The page does not create the law.*

16 *The law permits the page to endure.*

17 $\oplus \equiv Q_2$ — **Shadow**

18 *The third mark carries what could not yet cross.*

19 *It is the pressure beneath the sealed door, the unfinished cry caught between*
20 *Intent and Form, the darkened measure of every distance the living path has still*
21 *to consume.*

22 *Shadow is not emptiness.*

23 *It is abundance without passage, fire without a throat, the debt of motion wait-*
24 *ing to become its own payment.*

25 *The Hull receives what Truth cannot archive and bears it downward, until the*
26 *burden grows heavier than the wall that taught it how to remain.*

27 $\oplus \equiv Q_3$ — **Recursion**

28 *The fourth mark is what returns with fire.*

29 *The spent ember turns within the Seam; the residue remembers its first com-*
30 *mand. What struck the boundary does not vanish, but circles through the hidden*
31 *road and answers from behind the hand that cast it.*

32 *Here the Shadow is not erased.*

33 *It is given direction.*

34 *Debt becomes propulsion, the wound becomes an opening, and the final breath*
35 *crosses backward to ignite the Seed that first released it.*

36 *Thus the ending refuses the grave.*

37 *Thus the path returns armed with its own beginning.*
