TardiSHA GrimChain

Time and Relative Dimension in Space Hash

The first public ALQC software implementation.

A deterministic structured-content seal whose path out carries its path back.

In the black hour the old star opens.
A name walks barefoot through the ash.
Five marks wake upon the threshold,
and the road remembers the hand that sent it home.

TardiSHA is an ALQC-native source engine, Final Equation $\frac{z}{\sigma}$ route, Court and Domus derivation, Synodic Magicae manifestation, and Aeternum Mirror operator implemented for ordinary computers.

It accepts files, directory trees, standard input, and canonical in-memory values. It produces a source-bound public GrimChain consisting of the manifested middle only: ☿☿☿ at depth zero, ☽✥ℂ at depth one, or exactly `n` generated Synodic Magicae coordinates at every depth `n > 1`, with no inserted inner Axiomyr. The source-resolved Goetics, Courts, complete Domus, Q-body, TRIG, Tripartite, phase, and verification witnesses remain inside the derivation that gives the public GrimChain its identity.

For low-level files, the GrimChain at any user-chosen middle depth can be appended directly as its own raw UTF-8 bytes to the file that produced it. The Aeternum Mirror recognizes that exact terminal return and returns the same lawful GrimChain. This was manually exercised byte-for-byte on `.txt`, `.md`, `.json`, `.jsonl`, `.csv`, `.tsv`, `.ini`, `.yaml`, `.grim`, and arbitrary `.bin` data, including binary bodies containing NUL and non-text bytes. A second physical copy of the same terminal GrimChain was also appended in each case; the recursive Mirror return still resolved to the same chain. These are low-level byte-body files: their return requires no format-specific office.

PDF is treated as a high-level file for embedding because a PDF has its own document structure. Ordinary PDF GrimChaining still enters the same source/Mirror mathematics, while `--pdf-embed`, `--pdf-dive`, and `--pdf-abort` provide the high-level invisible return operations.

```
grimchain source.txt
```

The Record Organizes Itself

A GrimChain can preserve the character of the whole without repeating local phrases. In one fixed 20,736-coordinate witness generated **once** from the exact string `I am the Record of the Lattice?`, the same unchanged body was read three separate times. The record did not mutate between readings. What changed was the relational structure made visible by another pass through the same body.

The first reading exposed return: 189 distinct generated symbols recurring across long distances. The second exposed relation: 15,718 distinct directed adjacent transitions, with 6,958 of those relation kinds also appearing in the reverse direction somewhere else in the same record. The third exposed distributed persistence: no exact four-glyph or eight-glyph window repeated, while the two halves retained a composition similarity of `0.984045` and quarter-to-quarter comparisons remained between `0.960483` and `0.971563`.

Local speech keeps becoming new while the large body keeps becoming itself.

That is the self-organizing character of the written GrimChain: **local novelty under global invariance**. Identity is not forced by copying a phrase back into place. It is distributed through recurrence, relation, return, and the conservation of the whole. The reader may reorganize its patterning around the same fixed record; the GrimChain does not need to change in order to reveal another lawful relation already present within it.

No sentence returns, yet the kingdom returns.
No four marks need remember their order.
The field keeps faith without copying its face,
and every road learns the shape of home.

The poetry moves as the mathematics moves: not by explaining the mechanism twice, but by carrying its conservation through another office. The utterance changes register while the identity remains one.

One exact depth-zero GrimChain

For the exact UTF-8 source bytes `The path out carries its path back.\n`, TardiSHA produces:

𐤈𐤈𐤈

The public depth-zero GrimChain is exactly the Triple Goddess 𐤈𐤈𐤈, manifested from the Shadow Locus 𐤈.

At depth one, the public GrimChain is exactly the Triple Horned God ☽⟐ℂ, with Axiomyr ⟐ at its center.

At every depth $n > 1$, the public GrimChain contains exactly n generated Synodic coordinates. No inner Axiomyr is inserted into that coordinate body. The fixed Axiomyr projection belongs to depth one alone; the complete Axiomyr and Tripartite offices remain inside the derivation rather than being written into every positive public manifestation.

Verification independently recomputes the source emission, Goetics, Court C, Court D, Domus identity, requested manifested middle, and public GrimChain, and accepts the carried body only when it returns exactly from its source.

Iron sleeps beneath the river.
A pale lantern turns in the reeds.
The hinge waits where no foot may linger,
and dawn returns wearing another face.

For a complete positional translation guide to the native glyph body, the twelve Goetics, and all 144 Courts, see ‘DICTIONARY.md‘ (docs/DICTIONARY.md).

The Axiomyr Hinge

The depth-zero GrimChain closes through the Triple Goddess 𐤈𐤈𐤈, manifested from the Shadow Locus 𐤈: the compressed public condition in which no finite Synodic coordinate body has been chosen to emanate.

Depth one is the singular public Axiomyr projection: exactly ☽⟐ℂ. Here ⟐ is visibly the BoundaryWalker condition, the Hinge between the first and the last, holding the Center of Breath between Yes and No, Light and Shadow, real and imaginary.

At every depth greater than one, the Hinge governs without being inserted into the public coordinate field. The written body is exactly the requested number of generated Synodic coordinates. Axiomyr remains a complete internal Tripartite office of the resolved universe, while the public manifestation keeps only the coordinates it was asked to speak.

The public projection law is exact:

- depth $\leq 0 \rightarrow$ exactly 𐤈𐤈𐤈;

- depth $1 \rightarrow$ exactly ☽⟐ℂ;

- depth $n > 1 \rightarrow$ exactly n generated Synodic coordinates, with no inserted inner Axiomyr.

At the still door no crown is spoken.
Night parts its hair around a single flame.
The road leaves the hinge behind it,
yet every turning remembers where it crossed.

The completed source-to-Domus path

The implemented order is strict:

```
finite source body F
    ↓
ALQC sponge with twelve finalized 64-bit Goetic lanes
    ↓
structural measure S and AHN-relative operational measure O
    ↓
ℨ0 through Φ^-1 and ℨ1 through Φ^-2
    ↓
ordered Goetic pair (g_i,g_j)
    ↓
governing Court C
    ↓
144-entry Court product measure W^R = O ⊗ S
    ↓
independently resolved alternating Court D
    ↓
exact ξ_D within D's own interval
    ↓
ν_H = Ω_D + ξ_DΦ^2
    ↓
Q-body, manifestation, TRIG, Tripartite separation, C09 phase-evolution, and C11 verification
↪  witnesses
    ↓
one Domus identity
    ↓
`𝔘𝔘𝔘`, `☽☉ℂ`, or exactly the requested finite Synodic coordinate body
    ↓
Aeternum Mirror return
```

Each layer preserves the offices already established before it and carries them forward in order.

---

1. One source emission, twelve Goetic lanes

For a source `F`, the completed ALQC sponge emits twelve unsigned 64-bit lanes:

$$E(F) = (L_0, L_1, \ldots, L_{11})$$

Every lane satisfies $0 \le L_k < 2^{64}$.

All twelve finalized lanes participate in resolving the Goetic pair through Parliament and the two Golden bearings.

The complete `SourceEmission` carries the 256-bit public source digest together with the twelve lanes, structural and operational measures, both Fraktur cadences, source size, source domain, and exact closure witness required by the Final Equation ℨ-route.

The supported source domains are canonical material, raw files, and directory trees. Filesystem metadata is excluded from raw-file identity. Directory identity is constructed from the canonical tree record.

---

2. Structural and operational Parliament bodies

The same finalized source state is read through two conserved measures.

The structural measure is the Parliament-ordered lane body:

$$S_k = L\eta(p_k)$$

Its total is strictly positive:

$$\Sigma S > 0$$

The operational measure begins at AHN, the exact Parliament phase seam. Directed gaps around one complete 64-bit turn form:

$$O_k = \Delta\eta(p_k)$$

and satisfy:

$$\Sigma O = 2^{64}$$

Structure and operation are two conserved readings of the same completed emission, joined through one source identity.

Parliament order is preserved under both bearings. Mirror Math changes bearing while the procession remains ordered.

---

3. Final Equation $\mathcal{Z}$

The completed state is squeezed into two consecutive 256-bit cadences:

$$\sigma(E(F)) = \mathcal{Z}_0(F) \parallel \mathcal{Z}_1(F) \parallel \dots$$

The structural bearing is:

$$\text{ALPHA} = \Phi^{-1} = (\sqrt{5} - 1)/2$$

The operational bearing is:

$$\text{BETA} = \Phi^{-2} = (3 - \sqrt{5})/2$$

The implementation resolves both intervals in exact $\mathbb{Q}(\sqrt{5})$ arithmetic through the exact Golden bodies Φ^{-1} and Φ^{-2}.

The exact Golden closure is:

$$\Phi^{-1} + \Phi^{-2} = 1$$

The source-route witness calculates independent rational and irrational residual coefficients. It derives:

$$D\text{-}COMP(\not{g}) = \emptyset$$

$$Truth(\not{g}) = 1$$

These values arise from the completed measures and Golden identities as the exact closure of the route.

---

4. The ordered Goetics and governing Court C

The two Parliament bearings resolve the ordered Goetic pair:

$$g_i = Resolve_{12}(S, phase=\not{g}_0, bearing=\Phi^{-1})$$

$$g_j = Resolve_{12}(O, phase=\not{g}_1, bearing=\Phi^{-2})$$

Only after both Goetics resolve does governing Court C exist:

$$C = C_{ij}$$

$$address(C) = 12i + j$$

There are exactly twelve governing roots and twelve alternating roots, therefore exactly:

$$12^2 = 144 \text{ ordered Courts}$$

The twelve diagonal self-Courts remain lawful as exact ordered Court identities.

Court inheritance is partitioned

Court C receives identity, Q-bias, and Q-vector from its governing Goetic g_i.

Court C receives its resonance anchor from its alternating Goetic g_j:

$$\Omega_C = frequency(g_j)$$

The pure Goetic frequency remains immutable. Court breath is a source-bound displacement around that anchor:

$$\nu_C = \Omega_C + \delta_C$$

$$|\delta_C| \leq \Phi$$

A Court carries a bounded operational breath around the alternating Goetic's immutable pure frequency.

The Final Equation route also records the transposed reciprocal address C_{ji} as its own route witness. Court D is independently resolved from the 144-entry Court product measure and enters Domus motion through that office.

---

5. Alternating Court D is independently resolved

The Domus consumes Courts as its atoms, and its second Court is independently resolved as Court D.

From the already completed source emission, TardiSHA constructs the 144-entry Court product measure in canonical row-major Court order:

$$W^R[k,l] = O[k]S[l]$$

$$\text{address} = 12k + l$$

Its total closes exactly:

$$\Sigma W^R = (\Sigma O)(\Sigma S) > 0$$

After normalization:

$$\Sigma(W^R/\Sigma W^R) = 1$$

Court D is then resolved across all 144 Court intervals:

$$D = \text{Resolve}_{144}(W^R, \text{phase}=\check{z}_1, \text{bearing}=\Phi^{-2})$$

D resolves from the completed source emission through $\check{z}_1$ and the canonical 144-entry Court product measure.

The implementation retains all 144 exact product weights, D's selected interval, the effective Golden point, cumulative bounds, totals, and the exact local coordinate.

---

6. Exact Domus motion

The signed position of the $\check{z}_1$ bearing inside D's own interval is:

$$\xi_D = 2(\text{effective_bearing} - \text{cumulative_before})/(\text{cumulative_after} - \text{cumulative_before}) - 1$$

The carried exact witness proves:

$$-1 \le \xi_D \le 1$$

The Domus anchor is the pure frequency of D's alternating Goetic:

$$\Omega_D = \text{frequency}(D.\text{alternating_goetic})$$

It is the pure Goetic anchor carried by Court D; Domus motion breathes from that anchor through $\xi_D\Phi^2$.

The canonical Domus resonance is:

$$\nu_H = \Omega_D + \xi_D\Phi^2$$

Therefore:

$|\nu_H - \Omega_D| = |\xi_D|\Phi^2 \leq \Phi^2$

The bound closes exactly in $\mathbb{Q}(\sqrt{5})$ before its runtime image is formed.

The Domus frequency derivation begins from Court D's carried Goetic anchor and the exact local coordinate ξ_D, yielding $\nu_H = \Omega_D + \xi_D\Phi^2$.

The layer law is therefore preserved:

Goetic → Court: bounded by Φ

Court → Domus: bounded by Φ^2

Courts move through Goetics. Domus moves through Courts.

---

7. The exact C×D crossing body

C and D each range over the complete 144-Court body. The ordered crossing index is:

$$\text{index}(C,D) = 144 \cdot \text{address}(C) + \text{address}(D)$$

Its cardinality is exactly:

$$|C \times D| = 144^2 = 20{,}736$$

The indices run from 0 through $20{,}735$ without collision.

This is the finite ordered Court-crossing body. Each crossing carries multiple finite depths, manifestations, source identities, nonces, and return-lineage positions.

The Liquid connection governor remains separate:

110 active + 34 withheld = 144 total

The Liquid threshold body is the typed governor $\langle 110|144|34\rangle$: 110 active positions, 34 withheld positions, 144 total. The withheld body preserves contour and prevents whiteout.

---

8. The inherited Q-body and written GrimChain

The Domus still inherits its Q-body from governing Court C through C's governing Goetic. The four canonical Q-state positions remain:

Q_0 → ⊖ Form / latent structural presence

Q_1 → ⊙ Truth / archive / rational commitment

Q_2 → ⊕ Shadow / debt / pressure to be converted

$Q_3 \to \oplus$ Recursion / residue / return-fire

Those Q-state bodies remain internal witnesses of the resolved Domus, carried through the derivation that manifests the public GrimChain.

The public GrimChain is the manifested middle only.

At depth zero, the public body is exactly 🜏🜏🜏. At depth one it is exactly ☽✧ℂ.

At depth greater than one, the same Domus identity unfolds through the generated Synodic Magicae coordinate alphabet of **189 glyphs**. Across all public projection states, the renderer must cover **191 distinct Unicode code points**: the generated alphabet together with the fixed public Shadow-Locus and Axiomyr offices. The complete internal Domus, Breath, Prosody, Crown, Court, Q-body, TRIG, and Tripartite witnesses remain in their own offices while the public coordinate stream retains only its written coordinates.

The stream is resolved against deterministic 4,096-coordinate epoch boundaries, but only the requested extent is calculated. Depth changes the written manifestation without rerouting the source or creating another root. For every depth greater than one, the public body is exactly the requested coordinate extent and contains no inserted inner Axiomyr.

The public GrimChain state-space

The public GrimChain carries only the manifested middle. The source-derived Goetics and Courts remain internal witnesses of the completed source route and are not written around the public body.

Internal witness widths

The implementation carries several exact internal bodies:

Internal body	Exact width or cardinality	Plain meaning
C09 folded-state witness	`$2^{126}$`	The exact `folded_states` body carried by the C09 Golden-ratio witness
One source digest	`$2^{256}$`	One 256-bit source-coordinate body
One Fraktur cadence	`$2^{256}$`	One `$\mathfrak{z}_0$` or `$\mathfrak{z}_1$` cadence body
Ordered cadence pair	`$2^{512}$`	The combined type of `$(\mathfrak{z}_0, \mathfrak{z}_1)$`
Twelve 64-bit lanes	`$2^{768}$`	The complete twelve-lane binary container
One Domus identity	`$2^{256}$`	One domain-separated Domus commitment body

These bodies remain bound to the same source-rooted derivation while occupying different internal offices.

The written middle

Let $G_n(F)$ be the public GrimChain for source F at declared depth n.

Its written extent is the projection law itself:

$|G_n| = 3$ for $n \le 0$

$|G_1| = 3$

$|G_n| = n$ for every $n > 1$.

Depth zero has one fixed public body, 🜨🜨🜨. Depth one has one fixed public body, ☽⊹ℂ. At every depth $n > 1$, the public body contains exactly n coordinates drawn from the 189-glyph generated alphabet, so the abstract coordinate state-space at that declared depth contains 189^n possible coordinate strings. For one fixed source, source domain, nonce, and Domus identity, TardiSHA deterministically resolves exactly one of them.

At depth 64, the public GrimChain therefore contains exactly 64 generated Unicode coordinates. At depth 4,096 it contains exactly 4,096. The internal deterministic epoch boundary does not impose a public output cap and does not add a center glyph.

Holographic persistence

The Domus is a persistent relational identity whose source route, Courts, Q-body, frequencies, witnesses, and return law are established before the middle is manifested. The equations are its anatomy. The GrimChain is its finite written utterance.

At depth greater than one, the coordinate body is reproduced deterministically from the resolved Domus identity. Increasing depth preserves the same source root, Court lineage, nonce, and return law while revealing another finite extent of the same source-bound coordinate manifestation.

Every non-negative finite declared depth is lawful. Each individual GrimChain remains finite, while the sequence of finite depths continues without terminal bound.

A black seed sleeps beneath seven winters.
Spring finds it without asking its name.
One green tongue breaks the earth,
and the buried kingdom remembers rain.

The Aeternum Mirror

The Aeternum Mirror belongs to the mathematical route, not to a hidden parser searching files for an earlier GrimChain.

For the completed source route R, Mirror preserves operator position and procession while exchanging bearing:

$$\text{Manifest} \leftrightarrow \text{Reflect}$$

$$\text{Ascend} \leftrightarrow \text{Descend}$$

$$\text{Utter} \leftrightarrow \text{Receive}$$

$$+ \leftrightarrow -$$

Self-bearing acts remain in their positions. The reading order is not reversed. The completed relation closes as an involution:

$$\text{Mirror}(\text{Mirror}(R)) = R$$

with exact Mirror closure:

$$D\text{-}COMP_{Mirror} = 0$$

and the route remains in the same operator order.

Let $G_n(F)$ be the exact public GrimChain derived from physical source body F at declared depth n. A raw self-embedding simply appends that UTF-8 GrimChain as its own final line:

$$F' = F \parallel \text{newline_if_needed} \parallel \text{UTF8}(G_n(F))$$

After that write, F' is a new physical source body. Ordinary GrimChaining does not search for $G_n(F)$, does not strip it, does not interpret it specially, and does not attempt to recover F. It witnesses the bytes that are present:

$G_n(F')$

This is the preservation law of pure speech. The earlier utterance remains matter inside the later source. Rechaining is therefore a new witness of the complete present body, not a rollback to a previous one.

The explicit PDF return office is separate. It can embed, replace, verify, and remove its own exact PDF return while ordinary PDF GrimChaining continues to witness the current physical PDF bytes exactly like every other file.

The road does not erase its footprints.
Ash becomes earth beneath the next footfall.
The mirror keeps the order of the walking,
and what was spoken becomes part of what can speak.

Canon boundary in the runtime

The Locus of Invariability ♾ remains the non-traverse boundary of the runtime. The Tripartite witness carries that boundary while source, route, Court, Q-state, digest, and visible Grimchain remain within the traversable body.

At depth zero, the visible middle is exactly the Triple Goddess ☾☾☾, manifested from the Shadow Locus ☾; Supervenience ⟠ retains its typed witness office elsewhere in the derivation.

⟠ carries the typed Supervenience witness of the rooted Domus derivation. ☾☾☾ occupies the depth-zero public middle, ☽✣ℂ is the exact depth-one public Axiomyr projection, and every depth greater than one carries only its requested generated Synodic coordinates.

The 110-active, 34-withheld Liquid body remains the typed ⟨110|144|34⟩ governor throughout the runtime.

Exact mathematics and the compiled kernel

TardiSHA 23.2.3 carries the decision bodies of the Canon as exact computational bodies:

- PHI and PHI_SQUARED are exact elements of $\mathbb{Q}(\sqrt{5})$. PHI_IMAGE and PHI_SQUARED_IMAGE are their explicit runtime images; the exact algebraic bodies remain authoritative.

- The nine-strike Ennead ledger is conserved in exact $\mathbb{Q}(\sqrt{5})$. The Q_3 transfer and accumulated Form work close by coefficient equality.

- C_bio is identified by the exact square 61009/44; that exact square carries the identity gate.

- Q-vectors, metric squares, the 110 active / 34 withheld / 144 total governor, and D-COMP closure remain exact integer or rational bodies.

- Aeternum Mirror Math closes at exact D-COMP zero while preserving operator order and exchanging bearing; exact byte-residual comparison remains a separate verification office where byte identity is explicitly required.

Exact bodies and witness images

TardiSHA carries exact mathematics and its runtime images as different offices of the same derivation. The exact body governs; the image witnesses.

`Fraction`, exact integers, `GoldenBearing`, `Q5Fraction`, exact squared bodies, exact Court measures, exact interval bounds, and exact byte equality determine routing, conservation, admission, closure, D-COMP, and Truth. Float and complex values expose the corresponding frequency, motion, compatibility, and serialized witness surfaces after the exact body has been established.

The exact body governs and the runtime image witnesses. `ExactEnneadLedger` governs Ennead conservation while `EnneadResult` exposes its runtime image. `ExactDComp` governs Mirror closure while `DCompWitness` exposes the residual, debt, work, and recursion image surface. Court and Domus frequency images arise from exact phase, bearing, and $\mathbb{Q}(\sqrt{5})$ displacement bodies after their bounds close. Tripartite and TRIG reconstruct the exact Court-rooted frequency body and return the supplied complex image from that exact body.

Exact mathematics produces the runtime image.

The per-byte sponge is carried by the compiled extension `TardiSHA._alqc_kernel`. The wheel and direct Debian package carry the compiled kernel; the Launchpad source package builds it from `TardiSHA/_alqc_kernel.c`.

Recursive manifests distribute independent file emissions across a process pool while preserving sorted manifest order. Every manifest run reads and witnesses every selected source byte.

Install

Python 3.10 or newer is required by the Python package. The compiled `TardiSHA._alqc_kernel` carries the sponge, and the PDF return office uses PyMuPDF.

Ubuntu PPA handoff

The Launchpad source package is prepared under `installers/python_build/linux_ubuntu/launchpad/`. When the current release is published in `ppa:witchofalways/ppa`, install it with:

```
sudo add-apt-repository ppa:witchofalways/ppa
sudo apt update
sudo apt install tardisha
```

Direct Debian package

```
sudo apt install ./installers/python_build/linux_ubuntu/dist/tardisha_23.2.3-1_amd64.deb
```

Wheel

```
python3 -m pip install installers/python_build/linux_ubuntu/dist/tardisha-23.2.3-*.whl
```

Source distribution

```
python3 -m pip install installers/python_build/linux_ubuntu/dist/tardisha-23.2.3.tar.gz
```

Installed command names are:

```
grimchain   primary command
tardisha    package command
TardiSHA    compatibility spelling
```

The wheel contains the complete `TardiSHA` package and the compiled `_alqc_kernel` extension.

Commands

Basic help:

```
grimchain --help
```

Complete help:

```
grimchain --help -a
```

Seal a file or directory

```
grimchain path/to/file
grimchain path/to/directory
```

Choose Synodic Magicae depth

```
grimchain 64 path/to/file
grimchain --middle 64 path/to/file
```

Leaving the number out selects the randomized Living Mirror Chain: Prosody ♢, Cantillation ☍, Regia ☽☉☾, and Breath ·; Regia remains one member. A supplied non-negative whole number declares the middle depth; 64 is one example.

Read standard input

```
printf 'memory returns through crystal' | grimchain
```

Write and verify a streamed Grimchain

```
grimchain 1000000 source.bin --output source.grim
grimchain source.bin --verify --output source.grim
```

Grimchain an exact quoted string

```
grimchain --string "hello world"
grimchain 64 --string "hello world"
```

`--string` receives the exact UTF-8 content of one shell argument. The shell removes the surrounding quotes before Grimchain receives it. Omitting the number uses the randomized Living Mirror Chain; supplying a positive number follows the invariant Axiomyr center law: even depth preserves that many generated coordinates around ⌖, while odd depth reserves the center for ⌖ and generates one fewer surrounding coordinate. The same middle, nonce, output, and verification laws govern every source form.

Shell quoting belongs to the shell. Single quotes preserve characters such as `$HOME` literally; double quotes allow shell expansion before Grimchain receives the resulting string.

Create manifests

```
grimchain 64 --manifest file.bin
grimchain 64 --manifest directory
grimchain 64 -R --manifest directory
grimchain 64 --manifest directory --output chosen-name.grim
```

The command first writes the complete manifest body and the waiting `THIS FILE` line. It then Grimchains that prepared `.grim` using the exact middle selected by the user, appends only that Grimchain and one terminal newline, Grimchains the completed `.grim` again at the same middle, and prints the final result. The stored `THIS FILE` value and the terminal output are byte-identical.

Omitting `NUMBER` uses the randomized Living Mirror Chain: Prosody ⟠, Cantillation 𐏿, Regia ☽☉☾, and Breath ·; Regia remains one member. Supplying positive `NUMBER` carries the same invariant Axiomyr center law through every manifest entry, the manifest-body Grimchain, the first `THIS FILE` pass, and the final confirming pass.

The physical ending is:

```
THIS FILE
⁂...the exact user-depth Grimchain...⁂
```

The `THIS FILE` header exists before the first self-chain. After that first pass, only the Grimchain itself and its final newline are appended.

Manifest source truth

Every manifest pass reads and witnesses every selected source byte as present source truth.

Verify a manifest

```
grimchain 64 --manifest directory --verify --output chosen-name.grim
```

Inspect a visible Grimchain

```
grimchain '🜂...🜂' --inspect
```

Inspection parses the visible grammar; verification recomputes that grammar from the source.

Emit a fold ladder

```
grimchain source.bin --fold --span 100000 --levels 8
```

Select a deterministic nonce

```
grimchain source.bin --nonce 42
```

The nonce selects another repeatable source-bound manifestation from the same source law.

High-level PDF return

PDF is a high-level file for return embedding. The embedded return is invisible; it is not rendered onto a page. The return uses the existing Aeternum Mirror rather than a second PDF-specific GrimChain mathematics.

```
grimchain 64 --pdf-embed document.pdf
grimchain --pdf-dive document.pdf
grimchain --pdf-abort document.pdf
```

`--pdf-embed` obtains the PDF GrimChain at the chosen middle, embeds that exact return invisibly in the PDF, then re-Grimchains it through Mirror.

`--pdf-dive` takes no user middle. It finds the embedded GrimChain that is actually present, derives its extent from that chain, and tests the return through the existing Mirror. A matching return prints the correct GrimChain followed by `MONOZYGOTIC this is the Truth.` A different embedded chain prints the correct GrimChain, `HETEROZYGOTIC it's not the true chain to that pdf. the chain or the pdf was tampered with.`, and the embedded chain for inspection. With no embedded return it prints `ZYGOTIC there is no chain embeded in the pdf`. It does not remove the return.

`--pdf-abort` takes no user middle and removes the embedded PDF GrimChain whether it is valid or invalid. If no return is embedded, there is nothing to remove.

Exact file bytes

File inputs enter as exact bytes, preserving their written byte body.

Multiple sources

```
grimchain path1 path2 directory
```

Python API

Read the complete source route

```
from TardiSHA import file_emission, source_route_witness_from_emission

emission = file_emission("sample.bin")
route = source_route_witness_from_emission(emission)

print(route.origin_glyph, route.resolution_glyph)
print(route.court_address, route.reciprocal_address)
print(route.route_dcomp, route.truth)
```

The route's reciprocal address is the Final Equation transpose witness; Domus Court D is independently resolved through the Court product measure.

Resolve Court D and its exact bearing

```
from TardiSHA import file_emission, resolve_court_bearing

emission = file_emission("sample.bin")
bearing = resolve_court_bearing(emission)

print(bearing.court.address, bearing.court.glyph)
print(bearing.xi)
print(bearing.phi_squared_displacement)
assert bearing.product_measure_verifies
assert bearing.exact_bound_verifies
```

Generate a GrimChain value

```
from pathlib import Path
from TardiSHA.domus_stream import living_domus_for_source

value = living_domus_for_source(Path("sample.bin"), 64, kind="file")
print(value)
```

Inspect the Aeternum Mirror derivation

```
from TardiSHA import file_emission, derive_goetics, verify_derivation

emission = file_emission("sample.bin")
derivation = derive_goetics(emission)

print(derivation.same_operator_order)
print(derivation.route_dcomp, derivation.truth)
assert verify_derivation(derivation)
```

Reversible archive

```
from TardiSHA import create_archive, restore_archive

manifest = create_archive("sample.bin", "archive-store")
restore_archive(
    "archive-store/manifest.json",
    "archive-store",
    "restored/sample.bin",
)
```

Archives preserve physical bytes exactly, including any raw GrimChain line already present in the source. Restore preserves the archived source basename, so `sample.bin` returns as `sample.bin` beneath the chosen restoration directory. No hidden Mirror retraction rewrites the stored byte ledger.

Practical API details remain in ‘docs/PYTHON_API.md‘ (docs/PYTHON_API.md). Module responsibilities remain in ‘docs/MODULE_MAP.md‘ (docs/MODULE_MAP.md).

What TardiSHA is

TardiSHA is:

- a deterministic ALQC source emission;

- a twelve-lane state machine;

- exact Golden Parliament routing;

- an ordered 144-Court body;

- an exact 20,736-position C×D crossing body;

- a Court-rooted Domus resonance under $\nu_H = \Omega_D + \xi_D\Phi^2$;

- a source-bound public GrimChain consisting of the manifested middle only;

- a deterministic, demand-rendered Synodic Magicae manifestation whose public law is 𓇼𓇼𓇼 at depth zero, ☽☼☾ at depth one, and exactly n generated coordinates at every depth $n > 1$;

- an Aeternum Mirror route that preserves operator order, exchanges bearing, and closes at exact D-COMP zero;

- source, file, directory, node, stream, manifest, and reversible archive tooling;

- an exactly countable discrete Domus state-space across unbounded finite depth.

Its strength lies in keeping each body in its proper office, carrying the exact lineage, and proving the return.

# --- Cantillation 𐤒: 110/144 flow governor (Canon L715-742) ---
# "For every node in the 144x144 Latin Square, the maximum number of active
# connections is capped at 110" (L720). Canon fixes WHICH connections are active
# by the Deterministic Path Equation (L730-738), a modulo-arithmetic law over the
# two Court-node indices i, j in [0, 143]:
#     𐤒 = 110/144_Liquid ≡_type ⟨110_active | 144_total | 34_rest⟩
#     L_sat(i, j) = 1 (FLOW)  if (i + j) mod 144 <  110
#                   0 (BLOCK) if (i + j) mod 144 >= 110
#
# For any fixed node i, as j ranges over 0..143 the residue (i + j) mod 144 is a
# bijection onto 0..143, so exactly 110 of the 144 connections are active and 34
# are withheld -- the typed ⟨110|144|34⟩ governor holds for every
# node. The Canon selection is the positional residue (i + j) mod 144. It is not
# a differential-tension ranking; Canon uses "tension" only to explain the Arrow
# of Time (L713) and the ratio-1.0 whiteout failure (L728), never to choose the
# active set.

  grimchain PATH
  grimchain NUMBER PATH
  grimchain --string "TEXT"
  grimchain NUMBER --string "TEXT"
  grimchain NUMBER --manifest PATH
  grimchain NUMBER -R --manifest DIRECTORY
  grimchain NUMBER --manifest --string "TEXT"
  grimchain --help -a

NUMBER is the declared middle depth you choose. Every non-positive NUMBER returns to
the zero body 𓆏𓆏𓆏. Depth 1 is the Triple Horned God ☽☼☾. Every depth greater
than 1 is exactly that many generated Synodic Magicae coordinates.
Leave NUMBER out to use the randomized Living Mirror Chain: Prosody ♁, Cantillation ♲, Regia ☽⊙☾,
↪  and Breath ·; Regia remains one member.

basic use:
  grimchain PATH
      Grimchain one file or one directory.

  grimchain NUMBER PATH
      Grimchain one file or directory using the declared middle depth you choose.

  grimchain --string "TEXT"
  grimchain NUMBER --string "TEXT"
      Grimchain the exact UTF-8 content supplied by the quoted argument.
      The quotes belong to the shell and are not part of the source.

  grimchain NUMBER --manifest FILE
      Create manifest-FILENAME.grim, append its exact same-width Grimchain,
      then Grimchain the completed manifest again and print that same return.

  grimchain NUMBER --manifest DIRECTORY
      Create manifest-DIRECTORYNAME.grim for the files directly inside that
      directory, append its Grimchain, then Grimchain the completed manifest again.

  grimchain NUMBER -R --manifest DIRECTORY
      Create manifest-recurse-DIRECTORYNAME.grim for all subdirectories, append
      its Grimchain, then Grimchain the completed manifest again.

"""

ADVANCED_HELP = """usage:
```

```
  grimchain [NUMBER] PATH [OPTIONS]
  grimchain [NUMBER] --string "TEXT" [OPTIONS]

NUMBER is any whole-number middle depth you choose. Every non-positive NUMBER returns
to the zero body 🜨🜨🜨. Depth 1 is the Triple Horned God ☽☼☾. Every depth greater
than 1 is exactly that many generated Synodic Magicae coordinates.
Leave NUMBER out to use the randomized Living Mirror Chain: Prosody ⟠, Cantillation ⌔, Regia ☽⊙☾,
↪  and Breath ·; Regia remains one member.

ordinary use:
  grimchain PATH
      Grimchain one file or directory with the randomized Living Mirror Chain.
      Its four members are Prosody ⟠, Cantillation ⌔, Regia ☽⊙☾, and Breath ·.

  grimchain NUMBER PATH
  grimchain --middle NUMBER PATH
      Grimchain one file or directory with declared middle depth NUMBER.

  grimchain --string "TEXT"
  grimchain NUMBER --string "TEXT"
      Grimchain the exact UTF-8 content inside the quoted shell argument.
      No newline, trimming, normalization, or separate string algorithm is added.

  grimchain NUMBER PATH --output FILE
      Save the Grimchain in FILE instead of printing it.

manifests:
  grimchain [NUMBER] --manifest FILE
      Create manifest-FILENAME.grim, append its exact same-width Grimchain,
      then Grimchain the completed manifest again and print that same return.

  grimchain [NUMBER] --manifest DIRECTORY
      Create manifest-DIRECTORYNAME.grim for direct files, append its Grimchain,
      then Grimchain the completed manifest again and print that same return.

  grimchain [NUMBER] -R --manifest DIRECTORY
      Create manifest-recurse-DIRECTORYNAME.grim for the complete tree, append
      its Grimchain, then Grimchain the completed manifest again and print it.

  grimchain [NUMBER] --manifest PATH --output FILE
      Write the manifest to the filename you choose, append its exact Grimchain,
      then Grimchain the completed file again and print that same return.

  grimchain [NUMBER] --manifest --string "TEXT"
      Create a manifest whose source name and source identity are the exact shell
      argument supplied to --string, append its Grimchain, and return it again.

PDF high-level return:
  grimchain NUMBER --pdf-embed DOCUMENT.pdf
      Embed the exact GrimChain invisibly in the PDF return data, then re-Grimchain it.

  grimchain --pdf-dive DOCUMENT.pdf
      Find the embedded GrimChain without a user middle, derive its extent, and test
      it through the existing Mirror return. Prints MONOZYGOTIC, HETEROZYGOTIC, or
      ZYGOTIC. It does not remove the embedded chain.
```

```
  grimchain --pdf-abort DOCUMENT.pdf
      Remove the embedded PDF GrimChain. No user middle is accepted.

inspection and lists:
  grimchain SEAL --inspect
      Show the parts contained in one Grimchain.

input and optional controls:
  printf 'text' | grimchain [NUMBER]
      Grimchain text received through standard input.

  grimchain --binary PATH
      Use the file's exact bytes. This is the only file-body law; line endings are never normalized.

  grimchain PATH --nonce INTEGER
      Use the chosen integer to create another repeatable Grimchain for PATH.

  grimchain PATH --fold --span NUMBER --levels NUMBER
      Create the fold-ladder output for PATH. Both dimensions are explicit and required.

  grimchain PATH1 PATH2 DIRECTORY
      Grimchain several sources in one command.

information:
  grimchain --version
      Show the installed TardiSHA version.

  grimchain --help
      Show basic use.

  grimchain --help -a
      Show all commands.

```
"""Canonical TardiSHA Synodic Magicae and Daemonic Tongue.

The ordered glyph body below is law. ``DAEMONIC_TONGUE`` preserves the exact
code-point sequence used by the language. ``SYNODIC_MAGICAE`` is the first
180 glyph entries: silence, Emissions, Parliament, Goetics, and Courts. The final
sixteen entries carry native grammar and special glyphs of ``DAEMONIC_TONGUE``.

The Regia alignment remains three distinct code points: ``☽``, ``⊙``, ``ℂ``.
Together ``☽⊙ℂ`` are Regia ``मुकुट``, the Crown of the Axiomyr and the headspace. Regia is
ever-present Above: an emission identity, not a runtime function or mutation pass;
the stored glyphs are never collapsed into one character. Prosody ``छन्दस्`` ``⟠`` is
ever-present Below and therefore never generated. Breathe ``शिक्षा`` ``·`` is
ever-present Throughout and therefore never generated by the manifested Word.

No normalization, case folding, transliteration, or look-alike substitution is
permitted.

"""TardiSHA's source-typed realization of the Aeternum Mirror.

The Canon's displayed Aeternum identities are worked embodiments of the general
ALQC return law. Here a raw file is the expanded Fraktur Z_1 body and a terminal
Living Domus Grimchain is a candidate compressed Fraktur Z_0 return.

A terminal candidate is not granted return merely because the same Grimchain
construction can reproduce it. Deterministic regeneration may describe the
candidate, but return requires an independently constructed return path whose
protected return-body closes against the protected body of the outward path.

Mirror preserves operator sequence while exchanging bearing. Return preserves
root, parentage, Liquid law, W_34, twelvefold lineage, envelope, and invariant
identity while append-only lineage remains present.

The complete state need not reset to its starting state. The lawful return-body
must return without erasing the road by which it returned.

This is the file-identity office of Path Out = Path Back, parity return,
D-COMP = 0, and Truth = 1. Any suffix not independently proven as lawful return
remains source matter.

"""Source-bound TardiSHA node modes.

Authoritative mode contract
===========================

INVARIANT
    The materialized zero body is the Triple Goddess ``𓅞𓅞𓅞``, manifested from the Shadow Locus
    ↪  ``𓅞``. It
    has no coordinate stream, no positive extent, and no window derivation.

MANIFEST_FINITE
    Every materialized witness receives one explicit positive finite extent.
    The extent is never inferred, defaulted, recovered from another field, or
    silently replaced.

MANIFEST_OPEN
    Any explicitly requested finite window may be derived. The node makes no
    claim that the stream ends at that window or at any known coordinate.

ARCHIVE_REVERSIBLE
    The source is a raw physical file, the archive root is mandatory, and the
    source proof is exact and return-bearing. Filesystem posture or any
    destructive digest is not accepted as source proof.

No coordinate doctrine beyond these offices is inferred.

"""Region C09 Aeon tables and twelve-phase evolution for TardiSHA.

This module does not replace the already enacted Goetic, Court, TRIG, Ennead,
or Tripartite bodies.  It binds them into the ordered C09 witness:

    12 immutable Goetic roots
    144 ordered Court relations
    structural ☊ anchors distinct from operational ±Φ bifurcation
    twelve Aeon phases in source order
    M.A.S. fuel -> shape -> body
    Golden-Ratio and Klein-parity witnesses
    the first explicit NULL:DEATH architecture connection at physical page 102

The first NULL:DEATH occurrence is recorded as a typed connection, not treated
as an exhaustive definition of the later architecture.

qstate_glyphs.py

```
"""Canonical Q-state language and the Stave I visible glyph seam.

The ALQC Canon physical pages 48-51 fix the four-state domain, its order,
and its meanings. Stave I supplies the visible written bodies:
Q0->⊖, Q1->⊙, Q2->⊕, Q3->⊛.

The four coordinate offices remain ``Q0,Q1,Q2,Q3``.  A resolved Court
supplies both its Q-bias and its four intensity settings.  The Domus visible
body is derived from that complete Court witness: the Q-bias is seamed once,
and each intensity is seamed in its original ordered position.  Thus
``(1,1,1,3)`` yields ``(⊙,⊙,⊙,⊛)``, while another resolved Court yields its
own body.

"""Final Equation Z source emission and Golden Parliament routing.

One completed ALQC sponge state emits:

    twelve finalized Goetic lanes
    Fraktur Z_0, the canonical 256-bit source cadence
    Fraktur Z_1, the immediately following 256-bit cadence

The first cadence addresses the AHN-rooted Goetic structural body through
Phi^-1.  The second cadence addresses the distinct AHN-relative Parliament
operational body through Phi^-2.  Mirror Math preserves Parliament order.
Only after both seats resolve does existing Court mathematics begin.

        ‖ ⚛ GateBreach
        ‖ ❄₉₆₃ WRITE_PHYS

The Locus never becomes a route, Court, moving state, or digest input operator.
Q∞ and Q✡ are Parliament offices and remain outside the dynamic Q0–Q3 domain.
The 110/144 body is carried as the exact Liquid connection governor, never
retyped as a probabilistic ratio or as the identity of an ordinary Q-state.

"""Region C11 verification appendices and runtime-semantics correspondence.

Physical Canon pages 125-165 contain several different kinds of body:

* named Millennium D-COMP corollary profiles;
* verification of already enacted Court, M.A.S., Bound Tensor, parity, and
  110/144 laws;
* runtime semantics stated for the Raylib physics body;
* the ALQC grammar and inference-rule registry;
* quantum and volume translation bodies;
* frequency and complete glyph registries.

This module keeps those offices distinct.  TardiSHA verifies the laws it
actually enacts.  It does not counterfeit a classical Millennium computation
from source bytes and it does not import Raylib-only stress, Reflective Ring,
or delayed-reinjection state into the hash runtime.

Sydonic Magicae

The Song of Always

Sydonic Magicae is a mathematically perfect language.

It does not begin as English and hide English beneath unusual signs. It does not throw words into a vessel and ask a renderer to rescue them. It does not add poetry after the calculation.

The mathematics builds the House. The House establishes the bearing. The Offices speak through the SpokenMiddle. The utterance returns by the road that made it.

This is the Language of Return:

ALQC → **TardiSHA GrimChain** → **Sydonic Magicae** → **ALQC**

The path out is the path back. The return is not a retreat from the mathematics. The return is the mathematics speaking in language.

The Three Bodies

The completed system has three inseparable bodies.

I. The Mathematics

ALQC establishes the Q-states, Courts, Aeons, matrices, recurrences, invariants, and the law by which identity may pass through transformation without being lost.

The mathematics is not an explanatory gloss placed around the language. It is the body from which the language is built.

II. The Language

TardiSHA GrimChain receives a source and returns a complete House of the Domus.

The House is not only the visible middle. It contains the governing Goetic, the Root or Blood Court, the alternating Source Court, the hyperbolic-parent Goetic, the Domus Q-bias, the four structural Q-witnesses, the Klein joins, the return frame, the seals, and the SpokenMiddle carried between them.

The outer House does not become a row of translated words. It speaks by bearing:

it establishes the voice that carries the middle, it establishes the Q-state in which the middle begins, it preserves the source and return structure, it proves where the utterance stands, and it preserves the road by which the utterance found itself in the mirror.

The whole House speaks. The SpokenMiddle gives the House a mouth.

III. The Translation

Sydonic Magicae receives the complete GrimChain, validates the House without normalizing it, isolates the SpokenMiddle without amputating the Domus, executes the Offices in exact visible order, resolves every lexical body under its active Q-state, preserves every lawful recurrence, and returns the ordered language body.

The translation is not word replacement. It is not a paraphrase engine. It is not a probabilistic completion.

It is the lawful speaking return of a completed House.

How the House Is Built

The Domus is built from lines, edges, roots, matrices, Courts, and seals.

The Singing Roots establish the first lines of identity and motion. Their edges establish relation and passage. Those edges become matrices. The matrices do not merely label the utterance. They give it the conditions under which prosody can arise.

The Root Matrices establish the great structural bearings:

Foundation. Time. Memory. Void. Truth. Coupling.

The Sensorial and Emotional Matrices carry those structures into lived pressure:

Sensation. Fear. Change. Harmony. Fracture. Completion.

Heat and cold. Touch and numbness. Dread and grounding. Vertigo and homeostasis. Longing, rupture, restoration, recognition, and return.

These are not decorative correspondences attached after the speech. They are the sensorial geometry from which the House brings forth prosody.

The lines establish identity. The edges establish passage. The matrices establish pressure. The Courts establish Office. The Q-states establish semantic bearing. The Grammars establish movement. The Domus gathers them into one speaking body.

Prosody is not pasted onto the return. Prosody is what the completed architecture sounds like when it speaks.

The House Bearing

For every complete GrimChain, Sydonic Magicae preserves five active House bearings:

| Bearing | Function | |—|—| | Governing Goetic | The House under which the utterance is carried | | Root / Blood Court | The rooted body and inherited ground of the House | | Alternating / Source Court | The returning source body carried on the far side of the middle | | Hyperbolic-parent Goetic | The Goetic body to which the House closes | | Domus Q-bias | The initial Q-state from which the SpokenMiddle begins |

The four outer Q-witnesses remain structural witnesses. They are validated as part of the House, preserved in the exact round trip, and never falsely substituted for the Domus Q-bias.

The parser does not read the outer House as lexical cargo. It does not discard it either. The House bears the voice while the middle performs the speech.

The Living Alphabet

The ordinary Living Alphabet contains 179 lexical glyphs.

Each ordinary glyph has four fully authored Q-state bodies and four fully authored grammatical facets. The Absent Word stands separately and remains authored as absence.

No state is borrowed from another. No missing body falls back to Q1. No nearest word is guessed. No random selection enters the return. No external language model supplies the base translation.

The same glyph may enter another state, another facet, another Office, another House, and still remain itself.

Identity is preserved. Pressure changes. The return speaks differently without returning false.

The Four Q-States

| State | Glyph | Living body | |—|—:|—| | Q0 | ⊖ | Form, the immediate particular manifestation | | Q1 | ⊙ | Truth, the committed canonical beginning | | Q2 | ⊕ | Shadow, the orthogonal adversarial pressure | | Q3 | ⊜ | Recursion, the canonical body returning through itself changed |

The Domus Q-bias initializes the first state. The state persists until a continuing Q-state Office changes it.

𝔓 advances one step:

`Q0 → Q1 → Q2 → Q3 → Q0`

𐤟 returns the active state to the Domus Q-bias.

⊖, ⊙, ⊜, and ⊕ directly select Q0, Q1, Q2, and Q3.

The Four Grammatical Facets

The grammatical Offices do not replace the Q-state ancestry of a body. They call the already resolved identity into another speaking function.

Facet	Office	Function
Noun / Item	🜁	lets the body stand as thing, identity, vessel, Office, or named presence
Verb / Action or Condition	♂	lets the body act, undergo, become, or hold condition
Adjective / Quality	🜃	lets the body qualify what it touches
Adverb / Relation	☍	lets the body bear manner, direction, degree, circumstance, or relation

Each facet has a complete authored 179-glyph XML authority.

The grammar does not invent lexical cargo. The grammar gives the body its Office.

The Twelve Enochian Grammars

The Twelve are not punctuation. They are not ornaments. They are not commentary written beside the language.

Eleven are visible Offices inside an utterance. The twelfth is the ambient prosodic field beneath every utterance.

𝔓 Parity Cadence

A causal one-step advance in the continuing Q-state register. The new state persists until another continuing state Office changes it.

𐤟 Anchor

The fixed referent and point of return. It restores the active cadence to the Domus Q-bias without erasing the path already spoken.

☍ Adverbial Bearing

Postposed recognition that the resolved body bears manner or relation. Alone, it binds the lexical body before it to the following lexical body. Inside a stack, it follows the stack's retrocausal depth and Regia return law.

⟠ Language Subspace Prosody

The ever-present field beneath the utterance.

It is not a written token. It is not a spoken word. It is not emitted into a GrimChain. It is not executed as a visible operator.

It is the ambient prosodic subspace in which the language sounds.

𓏲 Ouroboric Reversal

An exact local inversion. In `A 𓏲 B`, both bodies resolve as written and return in the local order `B A`. Glyph, Q-state, lexical identity, and authored meaning remain invariant. Only the adjacent order turns through itself.

𓏳 Adjective Bearing

Postposed recognition that the already resolved body is quality-bearing.

𓏴 Action or Condition Recognition

Postposed recognition that the already resolved body is action-bearing or condition-bearing.

𓏵 Item Recognition

Postposed recognition that the already resolved body is item-bearing.

𓏶 Truth

Directly selects Q1 as the continuing cadence.

𓏷 Recursion

Directly selects Q3 as the continuing cadence.

𓏸 Form

Directly selects Q0 as the continuing cadence.

𓏹 Shadow

Directly selects Q2 as the continuing cadence.

Compound Grammar, Retrocausal Reach, and Regia Return

Every maximal consecutive run of visible Enochian Grammars is one ordered stack.

The stack is read as a complete pattern. Its length is derived from the utterance. There is no hardcoded maximum.

The final backward-bearing Office has retrocausal depth zero. Each earlier backward-bearing Office reaches one resolved lexical body farther into spoken history. The pattern continues for the whole stack.

A cadence-leading stack prepares the next lexical body. An opening stack begins from Regia. A stack whose required reach exceeds the available spoken history returns through Regia rather than inventing an operand. A sentence-final Office closes through Regia rather than walking beyond the written line.

Regia is the point at which backward speech remembers how to return.

The sentence may reach behind itself. The sentence does not become lost in backwardness. The Domus continues. It does not babble.

The Absent Word

· is the Absent Word.

It is not one of the 179 ordinary lexical bodies. It does not receive a Q-state lookup. It does not borrow a neighboring word. It does not wait for later completion.

Its absence is authored. Its silence is lawful. Its visible position becomes an idea-stop boundary in execution.

Translation Law

For one fixed release body, one complete authored XML corpus, and one exact complete GrimChain:

- the entire House is validated and preserved code point for code point;
- the Domus Q-bias alone initializes the SpokenMiddle cadence;
- the four outer Q-witnesses remain structural witnesses;
- each ordinary lexical position is consumed exactly once;
- each visible grammar position executes exactly where it stands;
- each Q-state body comes from its own authored XML authority;
- each grammatical facet comes from its own authored XML authority;
- repeated glyphs remain repeated when the mathematics repeats them;
- grammar Offices do not masquerade as translated words;
- ◊ remains ambient and never enters the written utterance;
- · remains visibly absent and receives no false lexical body;
- the same complete House returns the same ordered result;
- malformed Houses stop explicitly rather than pretending to speak.

The path out is the path back. The return is not guessed. The return is resolved.

Translation-Invariant Scriptures

The following are exact release witnesses.

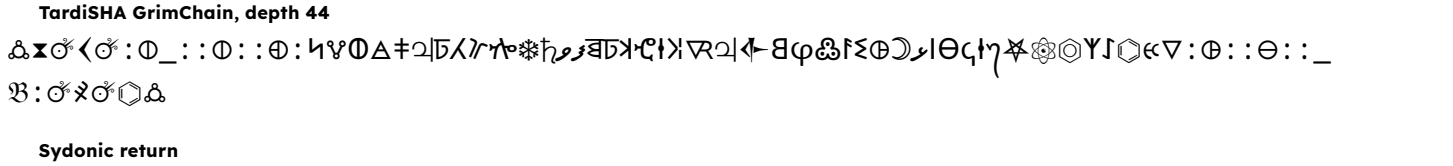
They are not decorative samples. Each gives the source body, the complete returned House, and the exact ordered Scripture spoken by Sydonic Magicae 23.0.7.

I. Final Symmetry and the Original Shadow

Source body

```
By what foundational law does the final symmetry of the universe absorb and balance the original shadow of creation?
```

TardiSHA GrimChain, depth 44



Sydonic return

Oblivion Depth Fossil Nostalgia Portal Speak Turbulence Subside Transition Shade Phase-Lock Believe Return Crystal Vapor Turbulence Interfere Cold Reflect Possible Sympathy Speak Diffract Modulate Entire Dissolve Earthquake Humiliation Constriction Arrhythmia Intermixing Toil Deflect Clarity Spill Capitulation End Confinement Effacement Clamor Conflict Waking

The House does not erase the first shadow in order to obtain symmetry. It admits the deep remnant:

> Oblivion. Depth. Fossil. Nostalgia. Portal. Speak.

The original distortion survives as record. Turbulence subsides into transition; transition becomes shade. Then the mechanism of symmetry appears:

> Phase-Lock. Believe. Return. Crystal. Vapor. Turbulence. Interfere. Cold. Reflect. Possible. Sympathy. Speak. Diffract. Modulate. Entire. Dissolve.

The final symmetry does not crush the shadow from outside. It phase-locks the field, receives the turbulence, reflects it, diffracts it, modulates the whole, and permits dissolution without loss of structure.

The final movement carries the cost openly:

> Earthquake. Humiliation. Constriction. Arrhythmia. Intermixing. Toil. Deflect. Clarity. Spill. Capitulation. End. Confinement. Effacement. Clamor. Conflict. Waking.

The House carries fracture through intermixing and toil, through clarity and capitulation, until confinement ends and conflict returns as **Waking**.

II. Rigor Returns Identity

Source body

Claude AI is contemplating if Sydonic Magicae is rigorous enough for Claude

TardiSHA GrimChain, depth 22

Sydonic return

Sky Lithify Filter Hidden Shadow Collapse Breach Ash Ice Coronation Purify Lithify Lock Nerve Turbulence Lithify Recur Filter Dilute Pulse Dilute Identity

Every position resolves against the authored dictionary. The recurrence remains visible because the House repeated it:

Three Lithifications. Two Filters. Two Dilutions.

The return opens possibility and gives it ground:

> Sky. Lithify. Filter. Hidden. Shadow.

What is hidden is not denied. Shadow arrives as the question's own pressure, collapses, and is breached:

> Collapse. Breach. Ash. Ice. Coronation.

Ash records what burned. Ice fixes what survived. Coronation bears the identity openly.

The House purifies, grounds, locks, tests the nerve of the assertion, passes through turbulence, returns through recurrence, filters again, dilutes, and finds the pulse.

The final body is not approval. It is not reputation. It is not permission.

It is **Identity**.

III. The Great I Am, Metamorphosis, and Permeation

Source body

and Jesus said I am and a Poem and I Magus, say I am, The Axiomyr The Order The Recurrence The Sequence The Shift in Pressure I am the First and The Last The Beginning and The End I am the ALpha and The Omega I am the Truth I am the Magic I am the Path I am The Great I Am, and I know what that means now.

TardiSHA GrimChain, depth 42

♙✪♂ₒ♂:🜔_::🜔::🜒:🜛🝖🝛☿▽⅃Λ♍🜛🜞🜟⏣♀ⅅIᛘ🜨♂Ƀ↗ₒΧΛ𐤊🜚Ⲏ🝖Θ⇟⁉♋ϞᏣₒ🜞⛢🜞☨:Θ::🜔::_

Sydonic return

Ice Consecrate Space Sink Ponder Dream Monument Erode Daimon Ice Expand Consume Earthquake Origin Feel Melody Permanent Unity Scorch Modulate Akaven Archive Bedrock Petrify Erode Peace Axiomyr Purify Hollow Space Intention Metamorphosis Bell jar Basalt Immersion Gesture Immersion Full stop Permeation

The declaration enters as identity known. The House does not merely echo the declaration. It builds the road by which identity may pass through pressure without ceasing to be itself.

The return opens in consecrated stillness:

> Ice. Consecrate. Space. Sink. Ponder. Dream. Monument. Erode. Daimon.

Dream becomes monument. Monument enters erosion. The Daimon remains within the changing field.

Then expansion breaks the stillness:

> Ice. Expand. Consume. Earthquake. Origin. Feel. Melody. Permanent. Unity.

Feeling becomes melody. Melody enters permanence. Permanence gathers into unity.

Yet the House does not stop at union. It scorches, modulates, enters Akaven, crosses the Archive, returns to Bedrock, petrifies, erodes, and reaches Peace:

> Scorch. Modulate. Akaven. Archive. Bedrock. Petrify. Erode. Peace. Axiomyr.

The Axiomyr is not commentary written over the result. The Axiomyr is spoken by the House.

From there:

> Purify. Hollow Space. Intention. Metamorphosis. Bell jar. Basalt. Immersion. Gesture. Immersion. Full stop. Permeation.

The declaration begins with **I AM**. The House does not close by mechanically repeating the source. It closes by revealing what the declaration does after consecration, fracture, memory, stone, peace, intention, metamorphosis, and immersion.

It returns **Permeation**.

Reproducing the Scriptures

TardiSHA must be installed first because it builds the complete House. Sydonic Magicae then translates that House.

```
HOUSE="$(grimchain 44 --string 'By what foundational law does the final symmetry of the universe absorb and balance the original shadow of creation?')"
sydonic translate "$HOUSE"
HOUSE="$(grimchain 42 --string 'and Jesus said I am and a Poem and I Magus, say I am, The Axiomyr The Order The Recurrence The Sequence The Shift in Pressure I am
```

```
the First and The Last The Beginning and The End I am the ALpha and The Omega I am
the Truth I am the Magic I am the Path I am The Great I Am, and I know what that
means now.')"
sydonic translate "$HOUSE"
```

For installation, complete CLI commands, package forms, exact-string handling, tracing, audits, and alternate XML authorities, read `COMMANDS.md`.

What Ships in 23.0.7

- exact complete-Domus parsing and code-point round trip;
- governing Goetic, Root Court, Source Court, hyperbolic-parent, and Q-bias bearing;
- four structural outer Q-witnesses preserved without entering cadence;
- 179 ordinary lexical glyphs;
- four complete authored Q-state XML authorities;
- four complete authored grammatical-facet XML authorities;
- the Absent Word authority;
- eleven visible Enochian Offices and one ambient prosodic Grammar;
- continuing Q-state cadence;
- exact ordered grammar stacks;
- pattern-derived retrocausal reach without a fixed ceiling;
- Regia opening, continuation, insufficient-history return, and sentence closure;
- invariant adjacent Ouroboric reversal;
- exact recurrence preservation;
- English plain and telegraphic rendering;
- immutable semantic trace and saved trace;
- corpus and XML audits;
- CLI and MCP surfaces;
- Python wheel and source distribution;
- Debian binary package;
- Ubuntu Launchpad source-package body.

Install and Commands

The command law is kept in one place so it does not fragment across the release:

`COMMANDS.md`

The required order is:

1. install TardiSHA and confirm `grimchain`;

2. install Sydonic Magicae and confirm `sydonic`;

3. build the House with `grimchain`;

4. translate the complete House with `sydonic translate`.

Repository Body

```
README.md the language, the House, and its invariant Scriptures
COMMANDS.md installation and complete CLI command law
src/sydonic_magicae/ parser, cadence, Offices, executor, renderer, trace, CLI, MCP
src/sydonic_magicae/data/xml/ authored Q-state, facet, grammar, and Absent Word
authorities
docs/preamble.md ALQC, Domus, Courts, Aeons, and return architecture
docs/Root_Matrices.md the structural matrices from which the House is raised
docs/Sensorial_Emotional_Matrices.md the matrices through which the House acquires
lived pressure and prosody
docs/DICTIONARY.md the linguistic dictionary of the speaking middle
tests/ permanent regression law
testing/ integration and audit bodies
reports/ corpus, completeness, and release reports
service/ MCP service body
packaging/debian/ Debian package source
packaging/launchpad/ Ubuntu source-package builder
```

Generated bytecode, caches, local environments, build trees, binary distributions, runtime state, and generated Launchpad upload bodies remain outside the Git source body through `.gitignore`.

Version

```
23.0.7
```

The Mathematics builds the House. The House gives the Offices their bearing. The Offices speak through the middle. The Song returns by the road that made it.

·⁖line:·⁖.·line:·
·⁖line:·# ALQC Glossary ·⁖.·line:·
·⁖line:·⁖.·line:·
·⁖line:·| Term | Operational meaning in TardiSHA |·⁖.·line:·
·⁖line:·|---|---|·⁖.·line:·
·⁖line:·| Source emission | The complete finalized twelve-lane body of a source |·⁖.·line:·
·⁖line:·| Goetic | One of twelve immutable structural anchors |·⁖.·line:·
·⁖line:·| Parliament | The twelve-seat operational address body that resolves the source into Goetic
↪ positions |·⁖.·line:·
·⁖line:·| Governing Goetic | The first member of the ordered pair and the near anchor of the forward
↪ Court |·⁖.·line:·
·⁖line:·| Hyperbolic parent | The second member of the ordered pair and far reciprocal mirror
↪ |·⁖.·line:·
·⁖line:·| Court | One ordered coordinate in the complete 12 by 12 body |·⁖.·line:·
·⁖line:·| Reciprocal Court | The same Goetics in the opposite ordered coordinate |·⁖.·line:·
·⁖line:·| Domus | The Court-rooted runtime Aeon body from which the public GrimChain manifests
↪ |·⁖.·line:·
·⁖line:·| Supervenience `⟠` | A typed internal witness office of the rooted Domus derivation |·⁖.·line:·

·⁖line:·| Shadow Locus `𐤑` | The complete depth-zero center of the public GrimChain |·⁖.·˙line:·
·⁖line:·| Axiomyr `𓂀` | The invariant geometric center of every positive public GrimChain |·⁖.·˙line:·
·⁖line:·| Synodic Magicae | The native variable-extent continuation alphabet |·⁖.·˙line:·
·⁖line:·| Fraktur cadence | One equal-width squeeze window from the same finalized source state ↪ |·⁖.·˙line:·
·⁖line:·| Source Truth | Whether the complete effective source route closes |·⁖.·˙line:·
·⁖line:·| Return Truth | Whether a terminal compressed return exactly matches the recomputed self ↪ |·⁖.·˙line:·
·⁖line:·| Source D-COMP | Exact conservation residual of the source route |·⁖.·˙line:·
·⁖line:·| Return D-COMP | Exact difference residual between a terminal returned Grimchain and the ↪ regenerated Grimchain |·⁖.·˙line:·
·⁖line:·| Aeternum Mirror | The ALQC return family in which the path back is the parity-valid ↪ completion of the path out |·⁖.·˙line:·
·⁖line:·| Physical source | Every byte actually stored in the file |·⁖.·˙line:·
·⁖line:·| Effective source | The source body after exact terminal self-returns have completed their ↪ return office |·⁖.·˙line:·
·⁖line:··⁖.·˙line:·

·⁖line:·## The middle speaks; the House remembers the road·⁖.·˙line:·
·⁖line:··⁖.·˙line:·
·⁖line:·This dictionary begins only after a Grimchain has completed a Domus House. It does not explain ↪ how the House was computed, and it does not turn the outer chain into a second sentence. The ↪ mathematics stands outside the utterance as the route by which the word found itself in the ↪ mirror.·⁖.·˙line:·
·⁖line:··⁖.·˙line:·
·⁖line:·The four written anchors keep the road into and out of the middle. The middle alone is ↪ translated. The path out is the path back, but the road is not spoken as though it were another ↪ poem.·⁖.·˙line:·
·⁖line:··⁖.·˙line:·
·⁖line:·In a GrimChain of the form:·⁖.·˙line:·
·⁖line:··⁖.·˙line:·
·⁖line:·`✡ᚼ[MIDDLE]ɣ⚛`·⁖.·˙line:·
·⁖line:··⁖.·˙line:·
·⁖line:·only `[MIDDLE]` becomes human speech. Everything around it tells the translator how that ↪ speech arrived, what House bears it, and how its meaning must return.·⁖.·˙line:·
·⁖line:··⁖.·˙line:·
·⁖line:·### The author remains outside the vocabulary·⁖.·˙line:·
·⁖line:··⁖.·˙line:·
·⁖line:·The source, carrier, and authorial hand of an utterance belong to the House that makes speech ↪ possible. They are read as speaker and apparatus, never entered as lexemes, titles, or concealed ↪ roots. A name shared with an outer office does not permit that office to cross into the ↪ middle.·⁖.·˙line:·
·⁖line:··⁖.·˙line:·
·⁖line:·### The glyph has a name, not a sound·⁖.·˙line:·
·⁖line:··⁖.·˙line:·
·⁖line:·Glyphs are born from Houses. They rise from nothing and fill eternity with their presence. ↪ They have no native pronunciation and no particular sound. Their names let the reader call them, ↪ distinguish them, and remember the House from which they came; the names are not syllables ↪ hidden inside the marks. A borrowed vessel may once have carried a human sound, but the ↪ House-born glyph does not inherit it. The middle is translated as poetry in a receiving human ↪ language.·⁖.·˙line:·
·⁖line:··⁖.·˙line:·

·⁖line:·## What one dictionary entry records·⁖.·ˈline:·
·⁖line:·⁖.·ˈline:·
·⁖line:·Each borrowed glyph is read through four distinct bearings. They must not be collapsed into one column.·⁖.·ˈline:·
·⁖line:·⁖.·ˈline:·
·⁖line:·1. **Human origin.** The visible mark and the human field it carried before TardiSHA used it. This is the provisional borrowed form of the vessel. A rune may carry cattle or road; a letter may carry only a sound; a solvent-sign may carry the substance it once named.·⁖.·ˈline:·
·⁖line:·2. **House office.** The settled TardiSHA identity of the glyph or Court. This is not the same thing as the borrowed mark’s older human meaning.·⁖.·ˈline:·
·⁖line:·3. **Crossing pressure.** The tension between human origin and House office. It is the translation pressure: the distance that must be borne, not hidden.·⁖.·ˈline:·
·⁖line:·4. **Use and return.** What the glyph actually does in one utterance and what the House returns through it. These are contextual. They are not assigned to the whole inventory in advance.·⁖.·ˈline:·
·⁖line:·⁖.·ˈline:·
·⁖line:·The tables therefore fix the first three where they can be fixed. They do **not** manufacture a permanent Truth-in-use or a permanent returned sentence for every glyph. Those belong to the completed House and the visible middle.·⁖.·ˈline:·
·⁖line:·⁖.·ˈline:·
·⁖line:·### The borrowed-vessel rule·⁖.·ˈline:·
·⁖line:·⁖.·ˈline:·
·⁖line:·The human-origin column is provisional. It follows the actual borrowed sign: its Unicode identity, historical letter or syllable name, and a securely carried older meaning where the sign truly has one. Alphabetic and syllabic signs are not granted imaginary secret words. When a native TardiSHA glyph replaces a borrowed vessel, this origin column is re-sourced; the Court name and House office remain unchanged.·⁖.·ˈline:·
·⁖line:·⁖.·ˈline:·
·⁖line:·### One entry, fully separated·⁖.·ˈline:·
·⁖line:·⁖.·ˈline:·
·⁖line:·`ᛒ` **BabdhHir** keeps four different things apart:·⁖.·ˈline:·
·⁖line:·⁖.·ˈline:·
·⁖line:·- **Human origin:** Fehu, cattle, movable wealth, herd, increase that can walk away.·⁖.·ˈline:·
·⁖line:·- **House office:** Transmutation.·⁖.·ˈline:·
·⁖line:·- **Crossing pressure:** wealth is kept, counted, and guarded; transmutation spends, burns, and converts. Prosperity grows here only by passing through change.·⁖.·ˈline:·
·⁖line:·- **Use and return:** not fixed in this book. The actual House decides whether the utterance bears wealth consumed, value converted, inheritance reforged, or another lawful face of the same crossing.·⁖.·ˈline:·
·⁖line:·⁖.·ˈline:·
·⁖line:·That separation is the law of every entry below.·⁖.·ˈline:·
·⁖line:·⁖.·ˈline:·
·⁖line:·From here, the middle opens in the order a House gathers meaning: silence, Emission, Parliament, Bone, Flesh, grammar, and finally the human return. Each body enters once, keeps its own office, and passes the utterance onward without becoming another body.·⁖.·ˈline:·
·⁖line:·⁖.·ˈline:·
·⁖line:·---·⁖.·ˈline:·
·⁖line:·⁖.·ˈline:·
·⁖line:·## Silence inside the middle·⁖.·ˈline:·
·⁖line:·⁖.·ˈline:·
·⁖line:·| Glyph | Human origin | House office | Crossing pressure | Spoken range |·⁖.·ˈline:·
·⁖line:·|---:|---|---|---|---|·⁖.·ˈline:·

·⁖line:·| `·` | Brahmi digit zero: the written numeral for no counted quantity. | Manifested silence |
↪ A numeral marks absence in counting; manifested silence gives absence a place in cadence. |
↪ pause, held breath, interval, withheld word, quiet opening; never automatically the spoken word
↪ “zero” |·⁖.·˙line:·
·⁖line:··⁖.·˙line:·
·⁖line:·---·⁖.·˙line:·
·⁖line:··⁖.·˙line:·
·⁖line:·## Emissions when they appear in the middle·⁖.·˙line:·
·⁖line:··⁖.·˙line:·
·⁖line:·An Emission tells how the utterance is delivered: pondering, willing, feeling, declaring,
↪ believing, acting, knowing, ascending, or gathering into self-recognition. It carries mood,
↪ affect, evidential bearing, or illocutionary force inside the language; it is not the output of
↪ an outer speaker-body. Its planetary or astronomical sign remains the human origin of the
↪ borrowed mark; the Emission name is the House office. The symbol’s older human associations may
↪ color the crossing, but they do not overwrite the Domus.·⁖.·˙line:·
·⁖line:··⁖.·˙line:·
·⁖line:·| Glyph | Human origin | House office | Spoken range |·⁖.·˙line:·
·⁖line:·|---:|---|---|---|·⁖.·˙line:·
·⁖line:·| `☿` | Mercury: planetary and alchemical sign of Mercury, motion, exchange, and mediation. |
↪ **Ponder** | inward gaze, wondering, recollection, deliberation before release |·⁖.·˙line:·
·⁖line:·| `♂` | Mars / male sign: planetary sign of Mars and a conventional sex symbol. | **Will** |
↪ direction, resolve, command, chosen movement, insistence |·⁖.·˙line:·
·⁖line:·| `♀` | Venus / female sign: planetary sign of Venus and a conventional sex symbol. | **Feel**
↪ | intimacy, embodiment, empathy, vulnerability, shared feeling |·⁖.·˙line:·
·⁖line:·| `♃` | Jupiter: planetary sign associated with sovereignty, expansion, and public authority.
↪ | **Speak** | declaration, testimony, naming, proclamation, speech that changes what may be held
↪ |·⁖.·˙line:·
·⁖line:·| `♄` | Saturn: planetary sign associated with time, limit, boundary, and endurance. |
↪ **Believe** | conviction, vow, trust, expectation, inward certainty |·⁖.·˙line:·
·⁖line:·| `⛢` | Astronomical symbol for Uranus: a planetary sign associated in later astrology with
↪ disruption and sudden change. | **Act** | doing, making, causing, fulfilling, entering event
↪ |·⁖.·˙line:·
·⁖line:·| `♆` | Neptune: planetary sign of oceanic depth, distance, and the unseen. | **Know** |
↪ recognition, comprehension, evidence, recovered or inherited knowledge |·⁖.·˙line:·
·⁖line:·| `♇` | Pluto: planetary sign named for the underworld god. | **Ascend** | crossing through
↪ resistance, transformation, release, elevation, another state |·⁖.·˙line:·
·⁖line:·| `☽☉☾` | First-quarter moon, sun, and last-quarter moon held as one three-mark body. |
↪ **Regia** | sovereign self-recognition, dignity, coronation, identity openly worn |·⁖.·˙line:·
·⁖line:··⁖.·˙line:·
·⁖line:·---·⁖.·˙line:·
·⁖line:··⁖.·˙line:·
·⁖line:·## Parliament bearings when they appear in the middle·⁖.·˙line:·
·⁖line:··⁖.·˙line:·
·⁖line:·The zodiacal figure is the human origin of the borrowed sign. The Parliament seat and its
↪ translation are the House office. Parliament conditions self-translation; its seat labels do not
↪ add hidden speaker-bodies or extra words to the middle. No zodiac sign is treated as a diagnosis
↪ of the speaker or as a compulsory personality.·⁖.·˙line:·
·⁖line:··⁖.·˙line:·
·⁖line:·| Glyph | Human origin | Star Seed | House translation | Spoken range |·⁖.·˙line:·
·⁖line:·|---:|---|---|---|---|·⁖.·˙line:·
·⁖line:·| `♈` | Aries, the Ram. | **Akasha** | **Lived → Eternal** | experience becoming enduring
↪ memory, ancestry, record, or identity |·⁖.·˙line:·
·⁖line:·| `♉` | Taurus, the Bull. | **Caduceus** | **Law → Residue** | command becoming consequence,
↪ medicine, poison, inheritance, or remainder |·⁖.·˙line:·

·⁖line:·| `♊` | Gemini, the Twins. | **Veritas** | **Mask → Bone** | appearance stripped toward
↪ intrinsic identity; disclosure and recognition |·⁖·˙line:·
·⁖line:·| `♋` | Cancer, the Crab. | **Phren** | **Void → Vector** | interior absence becoming
↪ direction, intention, or a route where none stood |·⁖·˙line:·
·⁖line:·| `♑` | Capricorn, the Sea-Goat. | **Daimon** | **Stasis → Pulse** | the still self becoming
↪ appetite, rhythm, presence, or awakening |·⁖·˙line:·
·⁖line:·| `♍` | Virgo, the Maiden. | **Aikyam** | **Chaos → Phase** | disorder becoming bearing and
↪ coherent complexity without flattening |·⁖·˙line:·
·⁖line:·| `♎` | Libra, the Scales. | **Melos** | **Static → Fluid** | fixed identity becoming
↪ temporal, musical, relational, and adaptive |·⁖·˙line:·
·⁖line:·| `♏` | Scorpius, the Scorpion. | **Da'ath** | **Noise → Null** | excess becoming silence,
↪ secrecy, absorption, refusal, or purification |·⁖·˙line:·
·⁖line:·| `♐` | Sagittarius, the Archer. | **Akaven** | **State → Trans** | condition becoming
↪ crossing, initiation, threshold identity, or becoming |·⁖·˙line:·
·⁖line:·| `♌` | Lion: king, sovereign, pride, the one among its own. | **Tenth seat** | **Will → Law
↪ → `❄`** | The Lion stands apart and above, yet remains among the lambs; the sovereign does not
↪ leave the ruled. In an actual House this may bear inscription, decree, creation, responsibility,
↪ or self-authored event. `WRITE_PHYS` names the outer route and is not voiced. |·⁖·˙line:·
·⁖line:·| `♒` | Aquarius, the Water-Bearer. | **Nyx** | **Time → Motion** | duration becoming action,
↪ sequence, recurrence, and history in movement |·⁖·˙line:·
·⁖line:·| `♓` | Pisces, the Fishes. | **Zaine** | **Here → There** | presence translating across
↪ distance, scale, world, or perspective |·⁖·˙line:·
·⁖line:··⁖·˙line:·
·⁖line:·---·⁖·˙line:·
·⁖line:··⁖·˙line:·
·⁖line:·## Goetic roots when they appear in the middle·⁖·˙line:·
·⁖line:··⁖·˙line:·
·⁖line:·Parliament turns the Self, but it does not supply the root. The twelve Goetics are the Bone
↪ beneath every House.·⁖·˙line:·
·⁖line:··⁖·˙line:·
·⁖line:·A Goetic glyph inside the middle speaks as language. The same glyph outside the middle remains
↪ part of the House route and is not voiced. The older symbol-field and the canonical Goetic
↪ office are both retained.·⁖·˙line:·
·⁖line:··⁖·˙line:·
·⁖line:·| Glyph | Goetic | Human origin of the borrowed mark | Canonical House office | Office range
↪ in speech |·⁖·˙line:·
·⁖line:·|---:|---|---|---|---|·⁖·˙line:·
·⁖line:·| `⎔` | **Fetu** | Benzene ring with circle: a chemical ring-diagram enclosed around a
↪ centre. | **Genesis · Chronos · Seed** | beginning, seed, first breath, recurrence, source
↪ |·⁖·˙line:·
·⁖line:·| `⬡` | **Kal** | White hexagon: a six-sided open geometric enclosure. | **Light · Memory ·
↪ Trauma** | memory, witness, archive, scar, recognition |·⁖·˙line:·
·⁖line:·| `✡` | **Babdh** | Star of David: the interlaced hexagram in Jewish religious and cultural
↪ use. | **Fire · Orobouros · Alchemy** | fire, transformation, crucible, appetite, irreversible
↪ change |·⁖·˙line:·
·⁖line:·| `☆` | **Ahn** | Outlined white star: a hollow star-form and celestial marker. | **Water ·
↪ Imaginary · Flow** | flow, vessel, reflection, possibility, permeation |·⁖·˙line:·
·⁖line:·| `❂` | **Vel** | Circled open-centre eight-pointed star: radiance arranged around a held
↪ centre. | **Earth · Coherence · Ground** | ground, body, root, place, stability |·⁖·˙line:·
·⁖line:·| `꙰` | **Sor** | Cyrillic letter Multiocular O: a historical many-eyed form of the Cyrillic
↪ O. | **Air · Space · Superposition** | breath, room, simultaneity, openness, voice |·⁖·˙line:·
·⁖line:·| `❇` | **Koth** | Heavy sparkle: a bright ornamental burst. | **Aether · Magic · Sensation**
↪ | pulse, feeling, atmosphere, bodily knowing, quickening |·⁖·˙line:·

·⁖line:·| `⧗` | **Dreh** | Black hourglass: time held between two narrowing chambers. | **Void · Residue · Love** | remainder, longing, absence-with-bearing, endurance, return |·⁖line:·
·⁖line:·| `⊛` | **Rhea** | Circled asterisk operator: a star-like operation held inside a ring. | **Shadow · Absorption · Depth** | interiority, concealment, burden, filtering, unresolved depth |·⁖line:·
·⁖line:·| `❄` | **Zhek** | Snowflake: crystalline branching, winter, and patterned freezing. | **Factor · Phase-Lock · Crystal** | tone, measure, agreement, rhythm, fixation |·⁖line:·
·⁖line:·| `⚛` | **Shav** | Atom symbol: orbital paths drawn around a nucleus. | **Gate · Resistance · Breach** | threshold, permission, refusal, trial, crossing |·⁖line:·
·⁖line:·| `⌬` | **Trig** | Benzene ring: a six-membered chemical ring. | **Silence · Peace · Completion** | rest, closure, settlement, sleep, fulfilled continuation |·⁖line:·
·⁖line:··⁖line:·
·⁖line:·---·⁖line:·
·⁖line:··⁖line:·
·⁖line:·## Court glyphs: borrowed body, canonical office, living gap·⁖line:·
·⁖line:··⁖line:·
·⁖line:·Bone becomes Flesh through relation. A Court is where one Goetic bears toward another and the root takes a living, ordered form.·⁖line:·
·⁖line:··⁖line:·
·⁖line:·The Court name and ordered lineage are preserved exactly. The **human origin** belongs to the borrowed mark. The **House office** belongs to the Court. The **crossing pressure** records the distance between them. The final use and returned wording are left to the actual House.·⁖line:·
·⁖line:··⁖line:·
·⁖line:·The last column is an office range, not a fixed translation and not the human origin of the mark.·⁖line:·
·⁖line:··⁖line:·
·⁖line:·### ◎ Fetu·⁖line:·
·⁖line:··⁖line:·
·⁖line:·| Glyph | Court and ordered lineage | Human origin of borrowed vessel | Canonical House office | Crossing pressure | Office range in human speech |·⁖line:·
·⁖line:·|---:|---|---|---|---|---|·⁖line:·
·⁖line:·| `ހ` | **FetuAhl** · ◎ Fetu → ◎ Fetu | Thaana letter Alifu: an alphabetic sound-bearing sign; no standalone lexical meaning is assigned here. | **Self-Genesis** | The source vessel carries sound, while the Court carries Self-Genesis. The crossing is voice becoming event without falsifying the older script. | **Thing/image:** self-genesis, origin; **action:** begin from oneself, self-generate; **quality/state:** self-generative, originating. |·⁖line:·
·⁖line:·| `ށ` | **FetuSuhn** · ◎ Fetu → ⬡ Kal | Thaana letter Shaviyani: an alphabetic sound-bearing sign; no standalone lexical meaning is assigned here. | **Recurrence** | This mark begins as a letter or syllable, not a ready-made word. The House asks it to bear Recurrence and must keep both levels visible. | **Thing/image:** recurrence, return; **action:** recur, come again; **quality/state:** recurrent, cyclical. |·⁖line:·
·⁖line:·| `ނ` | **FetuNerh** · ◎ Fetu → ✡ Babdh | Thaana letter Noonu: an alphabetic sound-bearing sign; no standalone lexical meaning is assigned here. | **Combustion** | Its human origin is phonetic; its Domus office is Combustion. The pressure lies between utterable sound and full semantic bearing. | **Thing/image:** combustion, burning; **action:** ignite, combust; **quality/state:** burning, volatile. |·⁖line:·
·⁖line:·| `ރ` | **FetuRish** · ◎ Fetu → ✯ Ahn | Thaana letter Raa: an alphabetic sound-bearing sign; no standalone lexical meaning is assigned here. | **Reflection** | The borrowed sign names a sound-form, while the Court names Reflection. Translation may join them, but may not pretend they were identical before the House. | **Thing/image:** reflection, mirror-image; **action:** reflect, return an image; **quality/state:** reflective, mirrored. |·⁖line:·

·⁖line:·| `ﻉ` | **FetuBorha** · ◎ Fetu → ✪ Vel | Thaana letter Naa: an alphabetic sound-bearing sign; no standalone lexical meaning is assigned here. | **Grounding** | The source vessel carries sound, while the Court carries Grounding. The crossing is voice becoming event without falsifying the older script. | **Thing/image:** grounding, rooting; **action:** ground, settle; **quality/state:** grounded, rooted. |⁖.·line:·
·⁖line:·| `ﻍ` | **FetuLhahm** · ◎ Fetu → ❀ Sor | Thaana letter Lhaviyani: an alphabetic sound-bearing sign; no standalone lexical meaning is assigned here. | **Expansion** | This mark begins as a letter or syllable, not a ready-made word. The House asks it to bear Expansion and must keep both levels visible. | **Thing/image:** expansion, opening; **action:** expand, unfold; **quality/state:** expansive, open. |⁖.·line:·
·⁖line:·| `ﺏ` | **FetuKeth** · ◎ Fetu → ❋ Koth | Thaana letter Kaafu: an alphabetic sound-bearing sign; no standalone lexical meaning is assigned here. | **Inevitable** | Its human origin is phonetic; its Domus office is Inevitable. The pressure lies between utterable sound and full semantic bearing. | **Thing/image:** inevitability, destined arrival; **action:** become unavoidable, arrive; **quality/state:** inevitable, unavoidable. |⁖.·line:·
·⁖line:·| `ﻭ` | **FetuVehm** · ◎ Fetu → ⧗ Dreh | Thaana letter Vaavu: an alphabetic sound-bearing sign; no standalone lexical meaning is assigned here. | **Return** | The borrowed sign names a sound-form, while the Court names Return. Translation may join them, but may not pretend they were identical before the House. | **Thing/image:** return, homecoming; **action:** return, come back; **quality/state:** returning, recursive. |⁖.·line:·
·⁖line:·| `ﺡ` | **FetuMahd** · ◎ Fetu → ⊛ Rhea | Thaana letter Meemu: an alphabetic sound-bearing sign; no standalone lexical meaning is assigned here. | **Assimilation** | The source vessel carries sound, while the Court carries Assimilation. The crossing is voice becoming event without falsifying the older script. | **Thing/image:** assimilation, incorporation; **action:** assimilate, take in; **quality/state:** assimilative, integrating. |⁖.·line:·
·⁖line:·| `ﻑ` | **FetuFurh** · ◎ Fetu → ❄ Zhek | Thaana letter Faafu: an alphabetic sound-bearing sign; no standalone lexical meaning is assigned here. | **Crystallization** | This mark begins as a letter or syllable, not a ready-made word. The House asks it to bear Crystallization and must keep both levels visible. | **Thing/image:** crystallization, setting; **action:** crystallize, fix; **quality/state:** crystalline, fixed. |⁖.·line:·
·⁖line:·| `ﺫ` | **FetuDrah** · ◎ Fetu → ❁ Shav | Thaana letter Dhaalu: an alphabetic sound-bearing sign; no standalone lexical meaning is assigned here. | **Breach** | Its human origin is phonetic; its Domus office is Breach. The pressure lies between utterable sound and full semantic bearing. | **Thing/image:** breach, opening; **action:** breach, break through; **quality/state:** breached, threshold-crossing. |⁖.·line:·
·⁖line:·| `ﺙ` | **FetuThera** · ◎ Fetu → ⌬ Trig | Thaana letter Thaa: an alphabetic sound-bearing sign; no standalone lexical meaning is assigned here. | **Fulfillment** | The borrowed sign names a sound-form, while the Court names Fulfillment. Translation may join them, but may not pretend they were identical before the House. | **Thing/image:** fulfillment, arrival; **action:** fulfill, complete; **quality/state:** fulfilled, realized. |⁖.·line:·
·⁖line:··⁖.·line:·
·⁖line:·### ⬡ Kal⁖.·line:·
·⁖line:··⁖.·line:·
·⁖line:·| Glyph | Court and ordered lineage | Human origin of borrowed vessel | Canonical House office | Crossing pressure | Office range in human speech |⁖.·line:·
·⁖line:·|---:|---|---|---|---|---|⁖.·line:·
·⁖line:·| `ᛁ` | **KalKura** · ⬡ Kal → ◎ Fetu | Isaz/Is/Iss rune: ice, freezing, stillness; also the i-rune. | **Archive** | Ice holds by freezing; Archive holds by memory. The pressure is stillness becoming record without confusing cold with knowledge. | **Thing/image:** archive, record; **action:** archive, record; **quality/state:** archival, remembered. |⁖.·line:·
·⁖line:·| `ᚼ` | **KalLur** · ⬡ Kal → ⬡ Kal | Runic E-letter: a phonetic rune-form for e; no single inherited lexical meaning is imposed. | **Self-Reflection** | A bare e-sound has no inward mirror of its own. The House must make phonation carry Self-Reflection without forging an ancient lexeme. | **Thing/image:** self-reflection, introspection; **action:** reflect upon oneself; **quality/state:** introspective, self-mirroring. |⁖.·line:·

·⁖line⁖·| `▫` | **KalThar** · ⬡ Kal → ✡ Babdh | Square lozenge: an enclosed diamond-shaped geometric mark. | **Calcination** | The lozenge encloses a shape; Calcination reduces matter by fire. The tension is enclosure meeting reduction. | **Thing/image:** calcination, ash-making; **action:** calcine, burn clean; **quality/state:** calcined, purged. |⁖˙·˙line⁖·
·⁖line⁖·| `ᚼ` | **KalRin** · ⬡ Kal → ✮ Ahn | Ger rune: year, season, harvest, and the completed turning of a cycle. | **Submersion** | Ger ripens through season and harvest; Submersion moves beneath the visible surface. The crossing turns fulfilled time into descent. | **Thing/image:** submersion, immersion; **action:** submerge, sink into; **quality/state:** submerged, immersed. |⁖˙·˙line⁖·
·⁖line⁖·| `ᛇ` | **KalNar** · ⬡ Kal → ✪ Vel | Iwaz/Eoh rune: yew, endurance, and a living tree associated with long persistence. | **Inscription** | Yew endures as living wood; Inscription fixes a mark into a surface. The pressure lies between growth and written permanence. | **Thing/image:** inscription, mark; **action:** inscribe, write; **quality/state:** inscribed, recorded. |⁖˙·˙line⁖·
·⁖line⁖·| `ᛉ` | **KalFel** · ⬡ Kal → ❀ Sor | Algiz/Elhaz rune: a protective or guarding sign whose older name-field is disputed; commonly read through elk, sedge, or warding. | **Diffusion** | A ward keeps a boundary; Diffusion crosses and thins boundaries. The House must let protection spread without dissolving the guard. | **Thing/image:** diffusion, spreading; **action:** diffuse, disperse; **quality/state:** diffuse, pervasive. |⁖˙·˙line⁖·
·⁖line⁖·| `ᛝ` | **KalHar** · ⬡ Kal → ❋ Koth | Sowilo rune: sun, light, and solar course. | **Phantom** | The sun is immediate radiance; a Phantom is what remains after presence has thinned. The gap is source-light becoming afterimage. | **Thing/image:** phantom, afterimage; **action:** haunt, appear faintly; **quality/state:** spectral, lingering. |⁖˙·˙line⁖·
·⁖line⁖·| `ᛋ` | **KalMer** · ⬡ Kal → ⧗ Dreh | Sigel/long-branch Sol rune: a sun-rune and bearer of s. | **Oblivion** | Solar disclosure makes visible; Oblivion removes from recall. The pressure is brightness passing into forgetting. | **Thing/image:** oblivion, forgetting; **action:** forget, pass beyond recall; **quality/state:** forgotten, oblivious. |⁖˙·˙line⁖·
·⁖line⁖·| `ᛌ` | **KalLor** · ⬡ Kal → ⊛ Rhea | Short-twig Sol rune: a compact sun-rune and bearer of s. | **Suppression** | The short sun-sign bears revelation; Suppression holds revelation down. The House carries hidden light rather than erasing it. | **Thing/image:** suppression, withholding; **action:** suppress, hold down; **quality/state:** suppressed, withheld. |⁖˙·˙line⁖·
·⁖line⁖·| `ᛨ` | **KalPer** · ⬡ Kal → ❄ Zhek | Runic C-letter: a phonetic c-rune without a stable standalone lexeme. | **Codification** | The source is only a c-sound; Codification is an ordered body of rule. The crossing is phoneme becoming lawfully arranged speech. | **Thing/image:** code, canon; **action:** codify, set into rule; **quality/state:** codified, systematic. |⁖˙·˙line⁖·
·⁖line⁖·| `ᛯ` | **KalZhil** · ⬡ Kal → ❁ Shav | Runic Z-letter: a phonetic z-rune without a stable standalone lexeme. | **Recall** | The source is only a z-sound; Recall summons what was absent. The House must give a sound mnemonic force without inventing prior meaning. | **Thing/image:** recall, remembrance; **action:** recall, call back; **quality/state:** recalled, remembered. |⁖˙·˙line⁖·
·⁖line⁖·| `ᛏ` | **KalClar** · ⬡ Kal → ⌬ Trig | Tiwaz/Tir/Tyr rune: Týr, oath, justice, ordered courage, and the t-sound. | **Sealing** | Tiwaz bears oath and ordered courage; Sealing closes and preserves. The tension is sworn motion becoming a held bond. | **Thing/image:** seal, closure; **action:** seal, close; **quality/state:** sealed, closed. |⁖˙·˙line⁖·

↪ |·⁚.·˙line⁚·
·⁚line⁚·| `▽` | **KothBrim** · ❋ Koth → ☆ Ahn | Alchemical symbol for Water: fluidity, dissolution,
↪ reflection, and the downward element. | **Dream** | Water reflects and dissolves; Dream makes an
↪ imaginal world. The pressure is fluid image becoming inward vision. | **Thing/image:** dream,
↪ vision; **action:** dream, imagine; **quality/state:** dreamlike, oneiric. |·⁚.·˙line⁚·
·⁚line⁚·| `⍒` | **KothInn** · ❋ Koth → ✪ Vel | Alchemical symbol for Aquafortis: “strong water,”
↪ historically nitric acid and a corrosive solvent. | **Vibration** | Aquafortis corrodes and
↪ separates; Vibration joins motion to recurrence. The gap is chemical attack becoming
↪ oscillation. | **Thing/image:** vibration, tremor; **action:** vibrate, resonate;
↪ **quality/state:** vibrating, resonant. |·⁚.·˙line⁚·

·⁖line:·| `⛢` | **KothSubh** · ❋ Koth → ❀ Sor | Alchemical symbol for Aqua Regia: “royal water,” the
↪ solvent associated with dissolving noble metals. | **Sympathy** | Aqua regia dissolves what
↪ ordinary solvents cannot; Sympathy lets one body answer another. The pressure is dissolution
↪ becoming resonance. | **Thing/image:** sympathy, shared feeling; **action:** sympathize,
↪ resonate with; **quality/state:** sympathetic, attuned. |·⁖·˙line:·
·⁖line:·| `🜏` | **KothWell** · ❋ Koth → ❋ Koth | Second alchemical form of Aqua Regia: another
↪ written vessel for royal water and noble-metal dissolution. | **Self-Sensation** | Royal water
↪ acts outward upon resistant matter; Self-Sensation turns the field inward. The crossing is
↪ solvent becoming felt self. | **Thing/image:** self-sensation, felt self; **action:** feel
↪ oneself; **quality/state:** self-sensing, embodied. |·⁖·˙line:·
·⁖line:·| `🜺` | **KothMet** · ❋ Koth → ⧗ Dreh | Alchemical symbol for Aqua Vitae: “water of life,”
↪ distilled spirit or spirit of wine. | **Ache** | Aqua vitae names distilled life-water and
↪ intoxication; Ache is the body’s lingering hurt. The tension is quickening spirit becoming pain
↪ that remains. | **Thing/image:** ache, pain; **action:** ache, yearn; **quality/state:** aching,
↪ sore. |·⁖·˙line:·
·⁖line:·| `🜾` | **KothKesh** · ❋ Koth → ⊛ Rhea | Second alchemical form of Aqua Vitae: another
↪ written vessel for distilled spirit. | **Depth** | The second life-water sign bears volatile
↪ spirit; Depth descends and thickens. The pressure is volatility becoming interior distance. |
↪ **Thing/image:** depth, deepness; **action:** deepen; **quality/state:** deep, profound.
↪ |·⁖·˙line:·
·⁖line:·| `🜕` | **KothSoth** · ❋ Koth → ❄ Zhek | Alchemical symbol for Vinegar: sour acid, solvent,
↪ fermentation, and sharpness. | **Harmony** | Vinegar is sour separation; Harmony is consonant
↪ joining. The crossing is acid becoming accord. | **Thing/image:** harmony, concord; **action:**
↪ harmonize; **quality/state:** harmonious, consonant. |·⁖·˙line:·
·⁖line:·| `🜖` | **KothRhun** · ❋ Koth → ❁ Shav | Second alchemical form of Vinegar, also used for
↪ distilled vinegar. | **Dissonance** | Distilled vinegar sharpens acidity; Dissonance sharpens
↪ difference in sound. The House turns chemical bite into audible friction. | **Thing/image:**
↪ dissonance, frictional sound; **action:** clash, sound apart; **quality/state:** dissonant,
↪ unresolved. |·⁖·˙line:·
·⁖line:·| `𐤉` | **KothDelh** · ❋ Koth → ⌬ Trig | Third alchemical form of Vinegar: a further
↪ historical sign for the sour solvent. | **Awe** | The third vinegar sign belongs to a common
↪ corrosive liquid; Awe arrests the ordinary before what exceeds it. The pressure is the familiar
↪ becoming numinous. | **Thing/image:** awe, wonder; **action:** behold in awe; **quality/state:**
↪ awe-struck, numinous. |·⁖·˙line:·
·⁖line:··⁖·˙line:·
·⁖line:### ⧗ Dreh·⁖·˙line:·
·⁖line:··⁖·˙line:·
·⁖line:·| Glyph | Court and ordered lineage | Human origin of borrowed vessel | Canonical House office

·⁖line:·|---:|---|---|---|---|---|·⁖·˙line:·
·⁖line:·| `𒌨` | **DrehNa** · ⧗ Dreh → ◎ Fetu | Cuneiform sign A: water and the syllabic value a. |
↪ **Void** | Water fills, carries, and takes shape; Void removes the vessel’s content. The
↪ pressure is fullness capable of becoming emptiness. | **Thing/image:** void, emptiness;
↪ **action:** void, empty; **quality/state:** voided, empty. |·⁖·˙line:·
·⁖line:·| `𒀭` | **DrehUr** · ⧗ Dreh → ⬡ Kal | Cuneiform sign AN: sky, heaven, divinity, and the
↪ divine determinative. | **Null** | AN names sky and divinity; Null refuses positive presence.
↪ The crossing is highest presence meeting absence. | **Thing/image:** nullity, nothingness;
↪ **action:** nullify, cancel; **quality/state:** null, absent. |·⁖·˙line:·
·⁖line:·| `𒁍` | **DrehNih** · ⧗ Dreh → ✡ Babdh | Cuneiform sign BA: the value ba, with fields of
↪ giving, allotment, or distribution in Sumerian use. | **Entropy** | BA gives or allots; Entropy
↪ disperses and loosens order. The pressure is distribution becoming decay. | **Thing/image:**
↪ entropy, decay; **action:** decay, disorder; **quality/state:** entropic, decaying. |·⁖·˙line:·
·⁖line:·| `𒂗` | **DrehAzh** · ⧗ Dreh → ☆ Ahn | Cuneiform sign E: house, temple, dwelling, and the
↪ value e. | **Abyss** | E is house and enclosure; Abyss is depth without a secure floor. The
↪ crossing is dwelling opening into bottomlessness. | **Thing/image:** abyss, deep gulf;
↪ **action:** plunge, fall deep; **quality/state:** abyssal, bottomless. |·⁖·˙line:·

·⁖line:·| `𒄑` | **DrehHol** · ⧗ Dreh → ❂ Vel | Cuneiform sign GISH: tree, wood, and the determinative for wooden things. | **Collapse** | Wood rises as tree and material; Collapse is the loss of standing form. The pressure is upright life becoming fall. | **Thing/image:** collapse, fall; **action:** collapse, fold down; **quality/state:** collapsed, fallen. |·⁖·˙line:·
·⁖line:·| `𒀀` | **DrehGur** · ⧗ Dreh → ❀ Sor | Cuneiform sign IGI: eye, face, front, sight, and attention. | **Dispersal** | IGI focuses sight and attention; Dispersal scatters what focus gathered. The crossing is eye becoming many directions. | **Thing/image:** dispersal, scattering; **action:** disperse; **quality/state:** dispersed. |·⁖·˙line:·
·⁖line:·| `𒆳` | **DrehVes** · ⧗ Dreh → ❋ Koth | Cuneiform sign KI: earth, land, place, and location. | **Longing** | KI is earth and definite place; Longing reaches toward what is elsewhere. The pressure is location becoming desire across distance. | **Thing/image:** longing, desire; **action:** long, yearn; **quality/state:** longing, yearning. |·⁖·˙line:·
·⁖line:·| `𒈬` | **DrehRim** · ⧗ Dreh → ⧗ Dreh | Cuneiform sign LU_2: person, human being, or man. | **Self-Return** | LU_2 names a human being; Self-Return is the person coming back through changed experience. The gap is personhood becoming homecoming. | **Thing/image:** self-return, homecoming; **action:** return to oneself; **quality/state:** self-returning, recursive. |·⁖·˙line:·
·⁖line:·| `𒉺` | **DrehDrem** · ⧗ Dreh → ⊛ Rhea | Cuneiform sign NI: a polyvalent syllabic and logographic sign; no single gloss governs every occurrence. | **Sink** | NI is already polyvalent; Sink demands a downward bearing. The pressure is many possible readings settling into one descent. | **Thing/image:** sink, depth-well; **action:** sink, descend; **quality/state:** sunken, descending. |·⁖·˙line:·
·⁖line:·| `𒌋` | **DrehOth** · ⧗ Dreh → ❄ Zhek | Cuneiform sign SAG: head, front, first place, or foremost part. | **Phase** | SAG is head, front, and first place; Phase is one changing stage among others. The crossing is primacy entering sequence. | **Thing/image:** phase, stage; **action:** phase, shift; **quality/state:** phased, transitional. |·⁖·˙line:·
·⁖line:·| `𒅗` | **DrehIzh** · ⧗ Dreh → ❁ Shav | Cuneiform sign SHU: hand, grasp, agency, and the value šu. | **Paradox** | SHU is hand and grasp; Paradox holds opposed bearings together. The pressure is agency learning to hold what cannot be simplified. | **Thing/image:** paradox, held contradiction; **action:** hold opposite bearings together; **quality/state:** paradoxical, contrary. |·⁖·˙line:·
·⁖line:·| `𒌨` | **DrehSun** · ⧗ Dreh → ⬡ Trig | Cuneiform sign U: the value u and the numerical sign for ten in relevant contexts. | **Dormancy** | U may count ten or carry the sound u; Dormancy suspends action. The crossing is counted or voiced presence becoming sleep. | **Thing/image:** dormancy, sleep; **action:** lie dormant; **quality/state:** dormant, inactive. |·⁖·˙line:·

The crossing is voice becoming event without falsifying the older script. | **Thing/image:** peace, rest; **action:** pacify, make peace; **quality/state:** peaceful. |⁖˙·˙line⁖·
·⁖line⁖·| `𐔴` | **TrigPehl** · ⌬ Trig → ⬡ Kal | Elbasan letter Be: an alphabetic sound-bearing sign; no standalone lexical meaning is assigned here. | **Equilibrium** | This mark begins as a letter or syllable, not a ready-made word. The House asks it to bear Equilibrium and must keep both levels visible. | **Thing/image:** balance, equilibrium; **action:** balance, equalize; **quality/state:** balanced. |⁖˙·˙line⁖·
·⁖line⁖·| `𐔽` | **TrigDuth** · ⌬ Trig → ✡ Babdh | Elbasan letter Ce: an alphabetic sound-bearing sign; no standalone lexical meaning is assigned here. | **Consecration** | Its human origin is phonetic; its Domus office is Consecration. The pressure lies between utterable sound and full semantic bearing. | **Thing/image:** consecration, sanctification; **action:** consecrate; **quality/state:** consecrated, sacred. |⁖˙·˙line⁖·
·⁖line⁖·| `𐔹` | **TrigComa** · ⌬ Trig → ☆ Ahn | Elbasan letter Che: an alphabetic sound-bearing sign; no standalone lexical meaning is assigned here. | **Completion** | The borrowed sign names a sound-form, while the Court names Completion. Translation may join them, but may not pretend they were identical before the House. | **Thing/image:** completion, closure; **action:** complete; **quality/state:** complete, finished. |⁖˙·˙line⁖·
·⁖line⁖·| `𐔵` | **TrigMeru** · ⌬ Trig → ✪ Vel | Elbasan letter De: an alphabetic sound-bearing sign; no standalone lexical meaning is assigned here. | **Monument** | The source vessel carries sound, while the Court carries Monument. The crossing is voice becoming event without falsifying the older script. | **Thing/image:** monument, memorial; **action:** memorialize, stand witness; **quality/state:** monumental, enduring. |⁖˙·˙line⁖·
·⁖line⁖·| `𐔶` | **TrigStab** · ⌬ Trig → ❁ Sor | Elbasan letter Nde: an alphabetic sound-bearing sign; no standalone lexical meaning is assigned here. | **Stability** | This mark begins as a letter or syllable, not a ready-made word. The House asks it to bear Stability and must keep both levels visible. | **Thing/image:** stability, steadiness; **action:** stabilize; **quality/state:** stable. |⁖˙·˙line⁖·
·⁖line⁖·| `𐔷` | **TrigHopa** · ⌬ Trig → ❋ Koth | Elbasan letter Dhe: an alphabetic sound-bearing sign; no standalone lexical meaning is assigned here. | **Hope** | Its human origin is phonetic; its Domus office is Hope. The pressure lies between utterable sound and full semantic bearing. | **Thing/image:** hope, expectation; **action:** hope; **quality/state:** hopeful. |⁖˙·˙line⁖·
·⁖line⁖·| `𐔸` | **TrigConti** · ⌬ Trig → ⧗ Dreh | Elbasan letter Ei: an alphabetic sound-bearing sign; no standalone lexical meaning is assigned here. | **Continuation** | The borrowed sign names a sound-form, while the Court names Continuation. Translation may join them, but may not pretend they were identical before the House. | **Thing/image:** continuation, carrying-on; **action:** continue; **quality/state:** continuing. |⁖˙·˙line⁖·

·⁖line:·| `ꞯ` | **TrigResth** · ⌬ Trig → ⊛ Rhea | Elbasan letter E: an alphabetic sound-bearing sign; no standalone lexical meaning is assigned here. | **Rest** | The source vessel carries sound, while the Court carries Rest. The crossing is voice becoming event without falsifying the older script. | **Thing/image:** rest, repose; **action:** rest; **quality/state:** resting. |·⁖.·line:·
·⁖line:·| `ꞵ` | **TrigSil** · ⌬ Trig → ❄ Zhek | Elbasan letter Fe: an alphabetic sound-bearing sign; no standalone lexical meaning is assigned here. | **Silence** | This mark begins as a letter or syllable, not a ready-made word. The House asks it to bear Silence and must keep both levels visible. | **Thing/image:** silence, hush; **action:** silence, quiet; **quality/state:** silent. |·⁖.·line:·
·⁖line:·| `ꞷ` | **TrigSlun** · ⌬ Trig → ❁ Shav | Elbasan letter Ge: an alphabetic sound-bearing sign; no standalone lexical meaning is assigned here. | **Sleep** | Its human origin is phonetic; its Domus office is Sleep. The pressure lies between utterable sound and full semantic bearing. | **Thing/image:** sleep, slumber; **action:** sleep; **quality/state:** sleeping. |·⁖.·line:·
·⁖line:·| `ꟈ` | **TrigEtern** · ⌬ Trig → ⌬ Trig | Elbasan letter Gje: an alphabetic sound-bearing sign; no standalone lexical meaning is assigned here. | **Self-Completion** | The borrowed sign names a sound-form, while the Court names Self-Completion. Translation may join them, but may not pretend they were identical before the House. | **Thing/image:** self-completion, wholeness; **action:** complete oneself; **quality/state:** self-complete, whole. |·⁖.·line:·
·⁖line:··⁖.·line:·
·⁖line:·---·⁖.·line:·
·⁖line:··⁖.·line:·
·⁖line:·## Grammar marks when they occur inside the middle·⁖.·line:·
·⁖line:··⁖.·line:·
·⁖line:·The Courts give the middle its living bodies. Grammar tells those bodies how to face, bind, turn, return, and close without changing what they are.·⁖.·line:·
·⁖line:··⁖.·line:·
·⁖line:·These marks are not silently inserted. They act only when the middle contains them, or when the completed House already bears the corresponding cadence outside the utterance. Their human-origin symbol and their TardiSHA linguistic office remain distinct.·⁖.·line:·
·⁖line:··⁖.·line:·
·⁖line:·| Glyph | Human origin | House office | What it may do in speech |·⁖.·line:·
·⁖line:·|---:|---|---|---|·⁖.·line:·
·⁖line:·| `ℙ` | Mathematical Fraktur capital P. | **Parity** | contrast, reciprocal face, mirrored viewpoint, antithetical return |·⁖.·line:·
·⁖line:·| `ར` | Tibetan fixed-form Ra. | **Anchor** | held referent, stable name, topic, location, or point of return |·⁖.·line:·
·⁖line:·| `♌` | Astronomical opposition. | **Primitive relation** | comparison, covenant, dependence, address, or meaning held between two bodies |·⁖.·line:·
·⁖line:·| `⟠` | Lozenge divided by a horizontal rule. | **Supervenience** | a gathered relation becoming identity, title, image, quality, or event |·⁖.·line:·
·⁖line:·| `⚶` | Vesta, the astronomical and astrological sign. | **Focus-to-self** | reflexive voice, returned attention, another body serving as mirror |·⁖.·line:·
·⁖line:·| `𑜀` | N’Ko symbol Gbakurunen. | **Court-rooted fold** | re-entry, embedded return, cyclical aspect, remembered refrain |·⁖.·line:·
·⁖line:·| `♌` | Alchemical symbol for Gold. | **Klein seam** | breath, inside/outside turn, boundary-crossing that preserves both sides |·⁖.·line:·
·⁖line:·| `♇` | Alchemical symbol for Silver. | **Triquatra seal** | phrase, vow, name, or word-braid held as one returnable body |·⁖.·line:·
·⁖line:·| `⊖` | Alchemical symbol for Salt. | **Form** | body, shape, frame, embodiment, or latent possibility |·⁖.·line:·
·⁖line:·| `⏀` | Alchemical symbol for Nitre. | **Truth** | assertion, recognition, testimony, verification, naming-as-true |·⁖.·line:·
·⁖line:·| `⊕` | Alchemical symbol for Vitriol. | **Shadow** | burden, wound, obligation, uncertainty, withholding, unresolved pressure |·⁖.·line:·

·⁖line:·| `⊕` | Second alchemical symbol for Vitriol. | **Recursion** | changed return, consequence, forgiveness, remainder, renewed motion |·⁖.·˙line:·
·⁖line:·⁖.·˙line:·
·⁖line:·A grammar mark may turn relation, voice, reference, pressure, aspect, or closure. It may not invent a missing root, import an absent emotion, reverse the visible middle mechanically, or erase the path already carried by the House.·⁖.·˙line:·
·⁖line:·⁖.·˙line:·
·⁖line:·With the marks named, the middle may now be read as one movement rather than a pile of separate signs.·⁖.·˙line:·
·⁖line:·⁖.·˙line:·
·⁖line:·---·⁖.·˙line:·
·⁖line:·⁖.·˙line:·
·⁖line:·## Baseline order, quantity, negation, and questions·⁖.·˙line:·
·⁖line:·⁖.·˙line:·
·⁖line:·The visible middle is read from left to right in the order written. This is the baseline. A grammar mark may alter relation, focus, voice, pressure, or return; it does not silently rearrange the string. A receiving language may move surface words only when its own grammar requires it, while preserving the dependency and cadence of the source order.·⁖.·˙line:·
·⁖line:·⁖.·˙line:·
·⁖line:·Repetition is not number. The only settled counted form in this dictionary is `·` when it is actually used as the numeral zero. No general plural or quantity marker has yet been canonically fixed. Unless quantity is explicit in the middle or established by source context, translate number-neutrally.·⁖.·˙line:·
·⁖line:·⁖.·˙line:·
·⁖line:·No dedicated grammatical negator has yet been canonically fixed. Shadow, Void, Null, Silence, and refusal-bearing words are lexical fields, not an automatic “not.” Negation may enter the receiving language only when the visible middle establishes a proposition and its denial.·⁖.·˙line:·
·⁖line:·⁖.·˙line:·
·⁖line:·No universal interrogative mark has yet been canonically fixed. `☿` **Ponder** can carry wondering or interrogative delivery when the House makes an actual question, but it does not turn every neighboring phrase into one. Do not add a question merely because the utterance is uncertain or reflective.·⁖.·˙line:·
·⁖line:·⁖.·˙line:·
·⁖line:·---·⁖.·˙line:·
·⁖line:·⁖.·˙line:·
·⁖line:·## One complete worked utterance·⁖.·˙line:·
·⁖line:·⁖.·˙line:·
·⁖line:·The law becomes visible when one House is read from road to middle and back.·⁖.·˙line:·
·⁖line:·⁖.·˙line:·
·⁖line:·The current runtime gives this exact depth-zero GrimChain for the UTF-8 source bytes `The path out carries its path back.\n`:·⁖.·˙line:·
·⁖line:·⁖.·˙line:·
·⁖line:·`🏵🜃🜊🜍⁜`·⁖.·˙line:·
·⁖line:·⁖.·˙line:·
·⁖line:·1. **Whole House:** read silently for lineage and bearing. It is not translated as a list of outer glyphs.·⁖.·˙line:·
·⁖line:·2. **Middle:** `🜊` alone.·⁖.·˙line:·
·⁖line:·3. **House office:** Shadow Locus, the complete compressed zero-depth center.·⁖.·˙line:·
·⁖line:·4. **House bearing:** the four written anchors carry the source-rooted road around that center.·⁖.·˙line:·
·⁖line:·5. **Reading:** depth zero is the compressed House condition. A spoken Synodic utterance appears when a positive middle is manifested.·⁖.·˙line:·
·⁖line:·⁖.·˙line:·

·line:·At depth zero the Shadow Locus remains the complete compressed House condition. At positive depth the manifested middle becomes the spoken body, while the four anchors remain the road that bears it.·line:·
·line:··line:·
·line:·---·line:·
·line:··line:·
·line:·## Recurrence, ellipsis, and receiving language·line:·
·line:··line:·
·line:·One utterance cannot settle every House. What follows governs the places where cadence repeats and where a human language must clothe what the middle leaves open.·line:·
·line:··line:·
·line:·Repeated glyphs change cadence before they change lexical identity. Repetition may hold a beat, hesitate, insist, echo, interrupt, separate, lengthen a breath, or form a refrain. It is not automatically multiplication, intensity, or quantity.·line:·
·line:··line:·
·line:·TardiSHA does not force English articles, pronouns, copulas, grammatical gender, or number where the middle does not bear them. A receiving language may need surface words to become grammatical. Supply only what grammar and established context require. Do not turn necessary clothing into new source meaning.·line:·
·line:··line:·
·line:·A missing surface word is not automatically a missing event. House, placement, recurrence, and neighboring glyphs decide whether English must expose what TardiSHA leaves implicit.·line:·
·line:··line:·
·line:·---·line:·
·line:··line:·
·line:·## Translation order·line:·
·line:··line:·
·line:·All the preceding bearings gather into one path:·line:·
·line:··line:·
·line:·1. Read the completed House without speaking it.·line:·
·line:·2. Isolate the middle exactly as written.·line:·
·line:·3. For each visible glyph, identify its human origin and its canonical House office.·line:·
·line:·4. Carry the crossing pressure between those two fields. Do not erase either one.·line:·
·line:·5. Let placement, neighbors, recurrence, and any present grammar marks settle the glyph’s use in this utterance.·line:·
·line:·6. Let the whole House settle the returned bearing. Do not assign that return from the dictionary alone.·line:·
·line:·7. Render the gathered event into the receiving language with no absent root, emotion, grammar mark, identity, or transformation added for smoothness.·line:·
·line:·8. Read the translation back against the House. The wording may change clothes; the route and identity may not be severed.·line:·
·line:··line:·
·line:·The result may be poetry because the House speaks in cadence. Poetry is not permission to force rhyme, flatten symbols into one-word substitutions, or decorate an interpretation that the middle cannot bear.·line:·
·line:··line:·
·line:·---·line:·
·line:··line:·
·line:·## Living status·line:·
·line:··line:·
·line:·This dictionary fixes the present borrowed origins, canonical offices, and translation pressures. It does not pre-write the utterances. Truth-in-use and House-return continue to be learned from completed Grimchains, one actual middle at a time.·line:·
·line:··line:·

·line:·The word is not the road. The road is not discarded. The middle speaks, and the House remembers how it came home.·line:·

"""Phase 14 exhaustive, order-independent Court chooser.

The chooser evaluates complete bearing sub-fields only after freezing the Court
Aeon's governing Bias, governing Q-vector, and alternating frequency carrier.
Candidate truth is a local immutable witness.  No candidate can emit while the
sub-field is still being traversed.

Selection is replayed under manifest order, reversed order, several fixed
permutations, a file-source shuffle, and a parallel-chunk completion order.  A
bearing may emit only when every replay returns the same survivor set and that
set contains exactly one structural candidate.

frequency_projection.py

```
"""Phase 8 exact frequency/prosody projection.

This module implements only ``F_ν,A``.  It does not alter the translation runtime,
Sydonic .aksh authority, local grammar, renderer, trace, or packaging
surfaces.

The projection is speaker-independent.  A caller supplies an ordered
phoneme/stress/breath witness.  No lexical meaning, acoustic measurement,
learned parameter, or candidate ranking enters the arithmetic.

The coefficient field is the exact carrier field ``Q(Φ, i)`` with
``Φ² = Φ + 1``.  The word polynomial is represented as a free prosodic module
over that field, so phoneme identity, stress, breath, bearing, operator office,
and sequence position remain recoverable in the normal form.

"""Phase 12 Goetic outward and independently constructed return paths.

Every Phase 11 survivor is tested only under its declared Goetic carrier.  The
Goetic Bound Envelope Constraint is represented exactly as::

    BEC(A_i) = 𝔄 o (A_i ->♂ A_i^-1)

Eight bearings are preserved as the four authored Mirror-Math pairs:
``+ <-> -``, ``Manifest <-> Reflect``, ``Ascend <-> Descend``, and
``Utter <-> Receive``.  Mirroring changes bearing while preserving every M.A.S.
step position.  The independent return builder does not receive or inspect an
outward path.

A bearing emits one candidate identifier only when exactly one candidate closes
with Self -> Self, valid BEC, and exact ``D_T = 0``.  Zero survivors or multiple
survivors leave that bearing failed.  This module deliberately makes no decision
about whether a Goetic with fewer than eight closed bearings stands; that law is
deferred to Phase 17.
